TENTH ANNUAL REPORT

OF THE

STATE BOARD OF HEALTH

OF

ILLINOIS.

WITH AN APPENDIX

EMBRACING

CORONERS' INQUESTS,
METEOROLOGICAL TABLES,
ILLINOIS ARMY BOARD OF MEDICAL EXAMINERS,
OFFICIAL REGISTER OF PHYSICIANS AND MIDWIVES.

SPRINGFIELD, ILL.:
SPRINGFIELD PRINTING CO., STATE PRINTERS.
1890.

ILLINOIS STATE BOARD OF HEALTH.

OFFICE OF THE SECRETARY,
SPRINGFIELD, ILL., 1888.

To His Excellency, RICHARD J. OGLESBY, Governor:

SIR: In conformity with the Twelfth Section of an Act to Create and Establish a BOARD OF HEALTH in the State of Illinois, approved May 25, 1877, I have the honor to submit to you the accompanying Report for the year 1887, including the Official Register of Physicians and Midwives.

Very respectfully,

JOHN H. RAUCH, M. D.,
Secretary.

NOTE: The delay in issuing this report is owing to the complications that existed in the State printing contract during the years 1887 and 1888.

MEMBERS OF THE BOARD.

W. A. HASKELL, M. D., Alton, *President*.

W. R. MACKENZIE, M. D., Chester.

*GEO. N. KREIDER, M. D., Springfield.

†H. V. FERRELL, M. D., Carterville.

NEWTON BATEMAN, LL. D., Galesburg.

R. LUDLAM, M. D., Chicago.

A. L. CLARK, M. D., Elgin, *Treasurer*.

JOHN H. RAUCH, M. D., Chicago, *Secretary*.

* Resigned July 10, 1887.

† Appointed to fill vacancy.

SUMMARY REPORT OF THE BOARD.

To His Excellency, RICHARD J. OGLESBY, Governor:

SIR:—Owing to want of space, a portion of the material prepared for this report has been omitted, only such matter being inserted as seemed most important.

Everything has been done to promote the sanitary interests of the State this year. Especial attention is called to that portion of the report pertaining to the public health, which sets forth the history of the introduction of cholera into this country in the autumn of this year, the correspondence and action of the BOARD in regard to prevention of its introduction into Illinois. The changes made by amendment of the act to Regulate the Practice of Medicine, which went into effect July 1, 1887, involved much labor.

It is not too much to say that had no other results been accomplished, by enforcing one of the provisions of the law, than that of putting an end to the itinerant practicing and vending of medicine, with free tooth-pulling, minstrel, Indian show and other accompaniments, great benefit has been rendered the people of the State. Thousands of dollars had been annually fleeced from the confiding public before the law went into effect. In eighteen months after the law went into operation, \$21,000 in license fees were refused by the BOARD as a matter of principle, it being deemed prejudicial to the public welfare to allow such practices.

The contingent appropriation of \$40,000, to be used in the event of outbreak, or threatened outbreak of any epidemic disease, and for sanitary investigations, has been left untouched, and lapsed into the treasury October 1st.

The chief feature of this report is the Register of Physicians and Midwives. It will show the extent and influence of the work of the BOARD upon higher medical education—a direct benefit to the people of the State—and its effect upon the profession in requiring better qualifications for practice. This report had to be entirely rewritten, owing to the delay of two years in printing; and it is not too much to claim that no State or country has issued a register of like character as complete in detail as this one.

Briefly presenting a comparison between the statistics of the first Register and those of the present volume, it will be seen that there were in the State, when the law regulating the practice of medicine went into effect, July 1, 1877, about 7,400 who called themselves doctors, of whom 3,600 were graduates and licentiates, and 3,800 non-graduates, or those who had nothing to show entitling them to practice medicine. On January 1, 1890, there were 6,215 engaged in practice in this State, of whom there were 5,640 graduates and licentiates, and only 575 non-graduates. There has been a decrease in the number of medical men in about two-thirds of the counties of the State, but there is a marked increase in Cook county. A similar improvement is apparent in the status of midwives. There were 1,125 midwives practicing in the State when the law went into effect. The number of licensed midwives practicing at the present time in the State is 731, of whom 292 have licenses based upon years of practice; 145 upon examination by the BOARD; and 294 as graduates, upon certificates from schools of midwifery or examining boards.

In 1880 the total number of licensed midwives was 757, but the number then holding licenses issued upon years of practice was 568; there were only 58 who had licenses of examination, and 131 who were graduates from schools of midwifery or examining boards. The State of Illinois is the only one in the Union which exercises supervision over midwives.

That portion of the report relating to the Illinois Army Medical Examining Board shows the first practical effort towards regulating the practice of medicine in this State, although stringent laws regulating the practice of medicine had been passed in 1817, and again in 1824.

If this Roster of Surgeons and Assistant Surgeons had been prepared at the close of the war, a great deal of trouble, and many cases of hardship and injustice would have been prevented. This report is mainly a contribution to the medical history of the State.

Respectfully submitted,

W. A. HASKELL,
WM. R. MACKENZIE,
GEO. N. KREIDER,
H. V. FERRELL,
NEWTON BATEMAN,
R. LUDLAM,
A. L. CLARK,
JOHN H. RAUCH.

ABSTRACT OF THE PROCEEDINGS
OF THE
ILLINOIS STATE BOARD OF HEALTH
AT THE
MEETINGS DURING THE YEAR 1887.

ANNUAL MEETING, SPRINGFIELD, JANUARY, 1887.

THE Tenth Annual Meeting of THE ILLINOIS STATE BOARD OF HEALTH was held in the office of the Secretary, Thursday and Friday, January 13-14, 1887.

THE BOARD met at 10 A. M., Thursday. Present: Drs. Newton Bateman, A. L. Clark, W. R. Mackenzie, George N. Kreider, and J. H. Rauch—the President, Newton Bateman, in the chair. The minutes of the quarterly meeting held October 23-29, 1886, were read and approved. Upon call of reports from officers the Secretary presented his "Quarterly Report and Annual Summary." The report was adopted and ordered printed in the published proceedings of the BOARD. A committee of three, consisting of Drs. Clark, Mackenzie and Kreider, was appointed to take action on the recommendations of the Secretary. Adjourned to 2 P. M.

In the afternoon the BOARD reconvened. Present, as at the morning session, and also Dr. W. A. Haskell. The afternoon was devoted to the consideration of matters pertaining to the Medical Practice Act and the investigation of the status of two medical colleges.

The BOARD met in the evening with the same present as at the afternoon session. The evening was devoted to auditing bills, consideration of the appropriations for the coming two years, and the proposed amendments to the laws under which the BOARD was acting. Adjourned to 9. A. M., Friday.

FRIDAY, January 14, 9 A. M.—The BOARD met pursuant to adjournment, President Newton Bateman in the chair. Present, as at Thursday's sessions.

The Secretary read the report of Prof. J. H. Long, the chemist of the BOARD, on the examinations made by him during the past year, of the Chicago water supply, and the waters of the Illinois and Michigan canal and Illinois river. The report was ordered printed.

The committee appointed to take action on the recommendations of the Secretary reported the following preambles and resolutions, which were adopted:

WHEREAS, The proper disposal of the sewage of Chicago is a question affecting the sanitary interests and vital welfare not only of the inhabitants of that city, but of the communities along the line of the Illinois and Michigan canal and the Illinois river; and

WHEREAS, Any adequate plan for such disposal must necessarily entail a large and comprehensive scheme of engineering works, involving the expenditure of millions of dollars; therefore, be it

Resolved, That it is the duty of the STATE BOARD OF HEALTH in the discharge of the responsibility imposed upon it by law, to exert its influence toward the protection of these interests and of the health and life of the citizens of the State in this connection.

Resolved, That, in undertaking a work of such magnitude, true economy dictates that a thorough and complete study of the problem should be first made and the necessary plans be carefully elaborated.

Resolved, That in the judgment of this BOARD, the work of the Chicago commission on main drainage and water supply has been wisely and judiciously performed, so far as it has gone, and that this work should be fully completed before any steps be taken looking to the adoption of a permanent plan of sewage disposal.

Resolved, That, in view of the immediate sanitary necessities of the city and territory affected, and without regard to any menace from Asiatic cholera or other extraordinary contingency, it is important that the full capacity of the Bridgeport pumping station be utilized as continuously as the conditions will permit; and to this end an adequate appropriation should be made by the city council of Chicago for the efficient maintenance of the station and operation of the entire plant of pumps.

Resolved, That a copy of these resolutions be transmitted to His Honor, the Mayor of Chicago, with a request that he lay the same before the city council with such recommendation of action, as, in his judgment, will best subserve the interests of Chicago and the region affected by the disposal of the sewage of that city.

The auditing committee reported bills to the amount of \$3,743.21 as being correct, and they were ordered paid.

Dr. Newton Bateman declined a re-election to the office of President, and on his motion Dr. W. A. Haskell was chosen President of the BOARD. Dr. John H. Rauch was elected Secretary and Dr. A. L. Clark Treasurer, for the ensuing year.

Dr. W. R. Mackenzie and Dr. George N. Kreider were chosen the auditing committee. A vote of thanks was tendered Dr. Bateman, the retiring President, the Secretary was authorized to act for the BOARD in the interim, and the BOARD adjourned at 12 M.

QUARTERLY MEETING AT CHICAGO, APRIL, 1887.

THE regular quarterly meeting of the ILLINOIS STATE BOARD OF HEALTH was held at the Grand Pacific Hotel, Chicago, on Thursday and Friday, April 21-22, 1887. There were present during the sessions of Thursday, Drs. A. L. Clark, R. Ludlam, W. R. Mackenzie, and John H. Rauch.

In the absence of the President, Dr. W. A. Haskell, Dr. Clark, was, on motion of the Secretary, elected chairman *pro tem*.

The minutes of the January, 1887, meeting were read and approved.

The regular order of business was temporarily set aside, and the examination of non-graduate applicants for certificates begun, a class of seven presenting themselves for such examination. During the day the following subjects were disposed of. Chemistry, Obstetrics, Practice of Medicine, Physiology, Hygiene, Medical Jurisprudence and Pathology.

The regular order of business being resumed, the Secretary, upon call for reports of officers, presented the following:

QUARTERLY REPORT OF THE SECRETARY.

During the quarter ended March 31, 1887, there were received in the Secretary's office 2,120 letters, reports and written communications, including 149 diplomas submitted for verification, and the papers accompanying applications for certificates by 150 physicians and 23 midwives. There were sent from the office during the same period an aggregate of 1,165 letters and other individual written communications, besides 1,267 copies of printed reports, circulars, pamphlets, etc.

Certificates and Licenses:

Of the 150 applications by physicians for certificates, 124 were issued upon the diplomas of colleges in good standing according to the Schedule of Minimum Requirements; 6 were issued after supplementary examination to graduates of colleges which had omitted some one or more of the requirements of the Schedule; 2 certificates were issued to non-graduates upon proof of over nineteen years' practice in the State; 4 duplicates were issued; and in the remaining 14 cases certificates have been refused either because the applications were based upon diplomas of colleges which are not recognized as in good standing, or because of other inability of the applicants to comply with the terms of the Medical Practice Act. To midwives 5 certificates have been issued upon diplomas or licenses; 12 were issued after examination (4 were rejected); and 6 upon proof of over nineteen years' practice in the State (one was refused upon failure to furnish such proof).

Chicago Sewage Pollution:

During the months of December, 1886, and January, 1887, the investigation of the effects of Chicago sewage upon the waters of the DesPlaines and Illinois rivers was continued. [This subject was fully treated and published as a Supplemental Report in the Ninth Annual Report of the BOARD, heretofore published.]

Vital Statistics:

It is extremely gratifying to be able to report a very decided improvement in the returns of births and deaths from the differ-

ent counties. With two exceptions the returns for 1886 are already received and have been tabulated. At the date of the last quarterly meeting it was estimated, from the information received through correspondence and by the personal observation of the Secretary at the various county seats visited, that there would be fully 25 per cent. increase in the total numbers of births and deaths reported. This anticipation has been more than realized. There is an increase of over 27 per cent. in the number of births reported, and of fully 30 per cent. in the number of deaths. In round numbers there are over 60,000 births and nearly 30,000 deaths returned for 1886, as against some 47,000 births and 23,000 deaths in the previous year. The total population of the State by the school census of 1886 was 3,308,177, and the above figures give a birth rate of not quite 18 per 1,000, and a death rate of less than 9 per 1,000. The deficiency in the report of births is thus seen to be even yet nearly 48 per cent., and in the return of deaths about 31 per cent.

But while this is true of the State as a whole, it is far otherwise as to individual counties, and still less so as to many cities and towns. A large number of places have adopted and now enforce the burial permit ordinance prepared by the BOARD, and in these the returns of deaths are complete. In Cook county, particularly, the returns of vital statistics are now very satisfactory. A total of 17,163 deaths and of over 23,000 births are reported for 1886,—giving a death rate for the entire county of 18.3 per 1,000, and a birth rate of nearly 25 per 1,000. For the city of Chicago the death rate was 19.46, and for the remainder of the county—a population of about 225,000—it was 15.5. There is still, however, a deficiency of about 28 per cent. in the number of births reported.

Should the improvement in these returns continue in the same ratio as for the past two years it will not be very long before the vital statistics of Illinois will be complete enough to satisfy every requirement, with a corresponding increase of value for the sanitarian and health officer, which they may turn to practical account in the interests of the communities with whose sanitary welfare they are charged. This desirable result will be hastened by the proposed amendments to the legislation on these subjects now under consideration by the General Assembly.

The Public Health:

While the seasonal diseases have been more prevalent than for several years past, there has been as yet no epidemic tendency in any of the specific maladies. Still the death rate for the quarter is higher than in any corresponding period since 1882, and there is ground for anticipating more sickness and an increased mortality throughout the year. The State, during the quarter, has been unusually free from the ordinary contagious diseases, with the exception of measles. This disease has been quite prevalent in some localities and a number of deaths therefrom have occurred. The fatality will, no doubt, decrease as the temperature becomes higher and the meteorological changes more equitable.

A conference of health authorities of towns and cities throughout the State will be held under the auspices of the BOARD in the city of Springfield during the latter part of this month.* The following topics will be discussed during the sessions, and a full attendance is expected:

1. Daily work of the health officer.
2. Inspection of houses and premises.
3. Disposition of the refuse of cities and towns.
4. Disposition of the night-soil of cities and towns.
5. Inspection and slaughter of animals.
6. Water supply of cities.
7. Water supply of towns and country.
8. Pollution of streams.
9. Management and control of contagious diseases.
10. Vital statistics from legal and sanitary standpoints.

Asiatic Cholera:

The recent outbreaks of Asiatic cholera at Essy, in Austria and on the island of Sicily, its reappearance at Buda-Pesth, and its northward extension in South America—among other considerations—make it important that the sanitary agencies throughout the State be aroused to activity and prepared for any emergency. The conference held last year was productive of much good, and the necessity for the stimulus to interest in preventive and precautionary measures is now even more urgent than at that time. The enormous immigration, which is again assuming the proportions attained in 1880-83, is another source of concern to health authorities, and will add to the responsibilities of the coming season. It will be remembered that Asiatic cholera has always been introduced into this country by immigrants and their baggage.

JOHN H. RAUCH, Secretary.

The report was accepted and ordered printed in the published proceedings of the BOARD.

At the afternoon session Dr. Mackenzie presented the following resolution which was adopted:

Resolved, That in view of the contingencies which may arise from the present large immigration movement, and the indications of a further increase in the mortality wave, which would seem to have reached its lowest depression in 1881-85, the Secretary is hereby instructed to advise and cooperate with local health authorities throughout the State to secure a vigorous prosecution of sanitary work in every locality.

On motion of Dr. Ludlam the following resolution was also adopted:

Resolved, That especial attention should continue to be paid to the character of the water supplies of cities, towns and villages, and to this end the Secretary is authorized to pursue his investigations of this subject.

On motion of Dr. Ludlam the conference of health authorities of cities and towns under the auspices of the BOARD, called to meet at Springfield, April 28-29, was postponed until May 3-4, 1887, and the Secretary directed to notify all parties interested of the change.

* Owing to lack of space it is impossible to print a report of this conference.

FRIDAY.—Present at Friday's sessions same as Thursday, with the addition of Dr. G. N. Kreider.

The examination of candidates was resumed and continued throughout the day, the following subjects being disposed of: Anatomy, materia medica and therapeutics, surgery and gynecology. The examination concluded at 6:30 P. M. Three were successful, viz: Wm. O. Powell, Ignatz Lange and Albert Phillip Ohlmacher.

Bills and accounts to the amount \$3,064.48 were audited, found correct and ordered paid.

Adjourned.

QUARTERLY MEETING, CHICAGO, JULY, 1887.

THE regular quarterly meeting of the ILLINOIS STATE BOARD OF HEALTH was held at the Grand Pacific Hotel, Chicago, July 8, 1887. Present: Drs. W. A. Haskell, A. L. Clark, George N. Kreider, W. R. Mackenzie and John H. Rauch, Secretary. President Haskell occupied the chair. The minutes of the last meeting were read and approved. Upon call of reports from officers, the Secretary presented the following:

QUARTERLY REPORT OF THE SECRETARY.

During the quarter ended June 30, 1887, there were received in the Secretary's office 1,425 written communications of all kinds, and a total of 1,200 were sent out. Of printed matter there were distributed 380 copies of the Eighth Annual Report, 322 of the Seventh, 405 Registers, 25 copies of Report on Medical Education and other of the regular publications of the Board.

Certificates and Licenses:

There were issued to graduates upon diplomas from medical colleges in good standing 154 certificates, and to six others upon examination; also 4 to non-graduates upon proof of twenty years practice in the State, and one duplicate. Fifteen applications for certificates were rejected through inability of applicants to comply with the requirements. Certificates were also issued to 28 midwives—to 11 upon diplomas or licenses, 10 upon examination and 7 upon years of practice.

The Medical Practice Act of 1877:

At this first meeting of the Board under the new law, intended, as it is, to remedy the defects of the original enactment of 1877, it seems fitting and may be profitable, to indulge in a brief retrospect of the work accomplished in the decade just closed. The

defects alluded to were very early recognized, but the attempt to regulate the practice of medicine by law was regarded as an experiment, and the BOARD hesitated to urge any change in the legislation until it had fully tested whatever was practicable under the law as it stood. As modifications were demonstrated by practical experience to be necessary, these were advised from time to time, but not until the last General Assembly was any change made.

Fortunately the BOARD, from the date of its organization, has been practically a unit in its work. Whatever individual differences of views or opinions existed from time to time on various subjects have always been reconciled before the BOARD formally committed itself to any plan of action, and the course finally adopted upon any given question has uniformly been that of which there was not merely a majority but a substantial unanimity of judgment. The stable personnel of the BOARD has contributed much to the development of this harmony of action. A majority of the present members have been such for ten years—the entire period of the BOARD'S existence. This lengthened term of service and the experience thus gained have broadened the views without, it is believed, unduly developing a spirit of official conservatism.

Recognizing the natural tendency of those deeply engrossed in their work to magnify its importance and making due allowance for this, still it is conceived that few laws of the period have done more for the practical welfare of the community than the Act to Regulate the Practice of Medicine in Illinois; and speaking for his colleagues, as the Secretary may properly do upon this occasion, it is not too much to say that the brief record which follows is the best earnest for the future of a faithful and conscientious discharge of the added responsibilities devolved upon the BOARD by the new act approved June 16, 1887.

What Has Been Accomplished:

The original law took effect July 1, 1877; and by its terms the following six months were allowed in which to comply with its requirements. During this period it was ascertained that there were in round numbers, on July 1, 1877, an aggregate of 7,400 persons engaged in the practice of medicine in Illinois. Of these about 3,800, or more than one-half, were non-graduates, and these comprised all classes, from those who had assumed the name of "Doctor" without any medical study or education whatever—often without any other form of education—up to practitioners who had attended one or more courses of lectures, had had some practical instruction in anatomy and hospital experience, but had been unable to complete a full term of study, or had failed to graduate.

The following table gives a comparative exhibit of the status of the profession at the beginning and at the end of these ten years:

Comparison of the total number and classes of Physicians in Practice in the State, July 1, 1877, and July 1, 1887.

	July 1, 1877.	July 1, 1887.
Total number engaged in practice.....	7,400	6,135
Graduates and licentiates.....	3,600	5,475
Non-graduates.....	3,800	660
Percentage of graduates and licentiates.....	48.6	89.2
Percentage of non-graduates.....	51.4	10.8

It is not alone that the proportion of graduated physicians is now nearly double that of ten years ago, but the attainments and qualifications of medical practitioners are very much better, owing to the increased thoroughness of the medical colleges, the longer terms of study, and higher standards of education, resulting largely from the efforts of State Boards of Health, in which efforts this BOARD was the pioneer.

Weeding out of the Incompetent and Unqualified:

When the law went into effect there were 1,923 physicians in the State who were not qualified and therefore could not comply with its provisions. Of these by far the greater number left the State, others abandoned practice, while many qualified themselves and graduated or passed the examination of the BOARD. In addition to this number the BOARD refused during the year 1878, 278 applications for certificates; in 1879, 175; in 1880, 154; in 1881, 127; in 1882, 111; in 1883, 98; in 1884, 85; in 1885, 75; in 1886, 73; and thus far in 1887, 25—making a total of 3,129. Of this number 640 had diplomas from schools that sold them or which graduated upon a mere nominal examination.

Of all classes of certificates, there have been issued since the organization of the BOARD a total of.....	9,295
To graduates and licentiates.....	7,009
To exempts, on years of practice.....	1,152
To licentiates upon examination by the BOARD (candidates examined 869).....	234

In 1880, the BOARD compiled the first Official Register of Physicians, and the progress of the work is illustrated by the following figures, taken from the different Registers since issued:

	June 14, 1880.	Dec. 29, 1881.	Dec. 1, 1884.	Feb. 9, 1886.	July 1, 1887.
Total number engaged in practice.....	5,978	5,987	6,098	6,065	6,135
Graduates and licentiates of medical institutions.....	4,282	4,488	4,884	5,107	5,350
Licentiates upon examination by the BOARD.....	191	183	159	145	125
Exempts—non-graduates—certificated.....	948	896	755	663	526
Exempts—non-certificated.....	558	420	300	150	134

In addition to those directly driven out of the State or compelled to abandon their pretenses of practicing medicine—because unable to comply with the law—there were in round numbers about one thousand more unqualified persons deterred from coming into the State or from attempting to practice. This estimate

is based upon the correspondence in the Secretary's office from those making preliminary applications or inquiries, and of whom nothing more was subsequently heard after they were made acquainted with the provisions of the Medical Practice act.

The passage of this act was the inauguration of a reform of the practice of medicine and medical education. The results of the work in this State have caused other States to enact similar laws, in some cases more stringent than that of Illinois. The work of the BOARD is recognized not alone in this country, but throughout the civilized world. It was the first time that different schools of medicine were placed upon the same board ostracising none, but requiring from all certain fundamental knowledge—the only question asked being whether they could comply with the spirit and intent of the law. The result of this course has been to remove many prejudices; and if the same policy is pursued in the future, the day is not far distant when those engaged in the practice of medicine will simply be known by the title of physician.

Fraudulent and Bogus Medical Colleges:

The pernicious and swindling practices of a number of "diploma mills" which were in active existence at the date of the passage of the Medical Practice Act early attracted the attention of the BOARD, and it is entirely within bounds to say that mainly through its efforts they were broken up. Others which were subsequently started had but a brief career, and the sale of diplomas in the United States has been substantially stopped.

The names, localities and other information concerning 31 of these fraudulent and bogus institutions have been published in the annual reports, and a glance at the list will show that they were scattered throughout the United States, so that the work of reform and of protecting the people from professional incompetency, imposition and charlatantry was not confined to Illinois, but extended to the entire country.

Complaints:

Since the organization of the BOARD, about 2,000 complaints, involving the professional conduct of the licentiates of the BOARD, have been received. These were settled, and the cause removed in nearly every case where there was ground for complaint, by a simple reminder that the BOARD considered such conduct a breach of professional propriety.

Certificates Revoked:

During this period 41 certificates were revoked for unprofessional and dishonorable conduct. Four of these were conditional, and their enforcement was suspended on the promise of the parties to conduct themselves in the future in an honorable manner, professionally. Two of these were restored during the past year for the same reason. The principal causes of revocation were fraudulent advertising, promises to perform cures that were impossible, advertising under an alias, making affidavits that they were gradu-

ates of medical schools when they were not, assuming the names of parties to whom diplomas had been granted in good faith, personating deceased individuals who had possessed diplomas, and in other ways being guilty of conduct intended to impose upon and defraud the public.

Medical Education:

The first move of the BOARD towards exercising any control over medical colleges that were apparently in good standing, was to pass a resolution to the effect that no diploma of any school that had two graduating courses in one year would be recognized after July 1, 1878. The BOARD became satisfied from the professional history of the class of graduates turned out by these schools that the teaching and course of study were too limited. Schools that followed this course, and are now in existence, do not, under the new rules, graduate one-half of their former number.

In 1876 an organization was formed, called the "American Medical College Association," the object of which was to elevate the standard of medical education. The colleges at that time were mainly private enterprises, and without concert of action nothing could be accomplished. It was agreed that after the sessions of 1883-84, the time and course of study were to be lengthened; also, that a preliminary educational requirement should be exacted of a student before being allowed to enter. This association held together for several years, and there was a prospect that the spirit and intent of its organization would be carried out; but as the time approached for putting into effect the reforms, signs of disintegration became manifest. The work of the ILLINOIS STATE BOARD OF HEALTH fully confirmed the sentiment that prompted the organization of this association, and as that organization only included the so-called "Regular" schools, in June, 1880, a committee was appointed by the BOARD for the purpose of ascertaining the requirements, course of study, etc., that were necessary to a definition of the phrase "good standing," as used in the Act to Regulate the Practice of Medicine, and after a careful examination of the subject, the BOARD adopted a "Schedule of Minimum Requirements," to take effect after the sessions of 1883-84.

As the result of this Schedule, which has been strictly adhered to, there are now 114 medical colleges which exact an educational requirement for admission, as against 45 before it went into effect. Attendance upon 3 or more lecture courses is now required by 41 colleges, as against 22, and *provision* is made for a 3 or more years graded course by 48 other schools. Hygiene and Medical Jurisprudence are now taught in 110 colleges, as against 42 and 61 respectively. The average duration of lecture terms has increased from 23.5 weeks to 24.8 weeks. Nine more colleges have lecture terms of 5 months, and 13 have terms of 6 months or over, as compared with the sessions of 1882-83.

The effect upon matriculates and graduates for the session of 1884-85, showed a decrease of the former of 6.1 per cent. and of

the latter a decrease of 6.8 per cent. from the sessions of the previous year. In 1882-83, there were in attendance upon the medical colleges of the United States, 11,997 students, while in 1884-85, there were only 10,992. The graduates of the first named session numbered 3,948, and of the latter 3,655.

These changes were mainly owing to the educational requirements of the BOARD demanded of a student before being admitted to a medical college, and to the stricter examination exacted by the colleges in endeavoring to comply with the BOARD'S Schedule of Minimum Requirements. The gist of the requirements of the BOARD embraced a demand that a student should have a good English education before being allowed to enter a medical college, and that he should have completed a reasonably full course of study, attendance upon lectures, clinics and hospital, before being graduated and authorized to enter upon the practice of medicine.

The necessity for such action will be appreciated when it is stated, that before this requirement was exacted, the evidences of a want of preliminary education and training were so apparent in the correspondence of the BOARD, that it is safe to assert that there were at least 700 graduates in the State who did not know how to spell the word diploma, the talismanic parchment upon which they laid so much stress as a guarantee of their professional knowledge and standing.

Quacks and Itinerants:

When the law went into effect there were 78 traveling doctors, visiting different portions of the State, who, by their fraudulent promises to cure, took from the sick, afflicted and credulous not less than \$225,000 annually. These charlatans and frauds obtained their money through the worst kind of false pretenses, many times taking the last cent the unfortunate victims had when they knew they could not benefit them. There are thousands of instances in this State where parties, not having ready money, were induced, in many cases fraudulently, to give their notes, only to find them later in the hands of a merciless collector. Many of these quacks had their headquarters in other states, from which they made periodical visits into Illinois to fleece its citizens. There are now only five of this class remaining who are allowed to swindle the public, and these have heretofore been shielded by the ten years prior practice clause of the Medical Practice Act.

During the past three years, owing to defects of that portion of the old law pertaining to itinerants, the State has been also infested with a certain class of vendors of nostrums who have carried on quite a thriving business with the assistance of brass bands, concert troupes, free tooth-pulling, and free performances of almost every imaginable character. In short, the ingenuity of the showman and mountebank have been made use of in attracting attention, while at intervals exaggerated and frequently false claims of the curative powers of their medicines are made, thus resulting in the sale of large quantities at enormous prices. The most popular

form in which these nostrums are sold is under the name of "Indian Remedies" with a "Wild West" accompaniment. It is a well known fact that the Indians know little or nothing of the remedial properties of plants. During the month of June last there were ten of these Indian companies in different parts of the State, besides four concert troupes, one company having in its employ 26 persons. Thousands of dollars have thus been fleeced from the credulous and excitable through these devices.

Midwives:

The result of the work has also been very beneficial upon the character of the midwives. These are very important personages, especially in sparsely settled localities, and among certain classes of the community; their ignorance has often resulted in much unnecessary suffering, serious and permanent injury, or even avoidable loss of life. During the past ten years the incompetent among this class have been very largely weeded out, and only graduates of good schools, or those who pass a thorough practical examination—are now granted certificates authorizing them to practice midwifery.

The Public Health:

Thus far in the season, the conditions affecting the public health have been quite satisfactory. Within the State there has been nothing to excite special concern or uneasiness. The most noticeable feature of the quarter was the continued prevalence of measles in many sections; during April there were many deaths from this usually non-fatal malady. An unprecedentedly large immigration has found the population so well protected that the occasional introduction of small-pox has not resulted in any spread of that disease. Of the other foreign epidemic diseases, the outbreak of yellow fever at Key West has thus far been confined to that isolated locality. With proper precautions, there should be no danger of its spread to the Gulf and South Atlantic cities. Practically, its existence at Key West is little more threatening than an epidemic at Havana or Vera Cruz; and the same measures which have proven efficient in the past few years in preventing its introduction from those places into the Mississippi Valley should be sufficient to guard against Key West.

Asiatic Cholera:

Until the announcement by cable, under date of July 3, of the reappearance of Asiatic cholera in Italy, there had been a long cessation of reports of the existence of this disease in localities threatening this country. The epidemic spread in South America seems to have been arrested, and although the German journals have been anticipating serious results from the cases which occurred in the neighborhood of Mayence last fall, the situation up to the close of June was reassuring. This recent outbreak in Italy shows that the invasion is not yet ended. Asiatic cholera is too capricious a disease to warrant any predictions concerning it, but it must not be forgotten that in 1873 the fact of its existence in

Austria was concealed until it had established a firm foothold over a large extent of the empire, and we do not certainly know the extent of its prevalence, either in Europe or South America.

Prof. Von Pettenkofer, whom the London *Lancet* calls "the sagest of hygienic strategists," has just concluded the publication, in the *Archiv für Hygiene*, of a series of papers "On the Present Aspect of the Cholera Question," concerning which it is said that if the wholesome truths they inculcate be well acted on, Germany will be placed in "as unassailable a position hygienically as her war office, headed by Von Moltke, has placed her in strategically."

Without discussing the non-contagionist views of this high authority—and which lead him to belittle such precautionary and preventive measures as inspection, isolation and disinfection—this country may unhesitatingly accept the practical lesson deduced by the *Lancet* from Von Pettenkofer's findings, to-wit: Vigilant attention to the sub-soil as to drainage, vigilant attention as to the water supply, such as within the next decennium Germany relies upon to make her as exempt from cholera visitations as her frontier is from attack—"forearmed hygienically against the one and strategically against the other."

The sanitary condition of our own State is fairly satisfactory, although much yet remains to be done in the improvement of water supplies, the disposal of night-soil, garbage, sewage, etc. The house-to-house inspection is still being pushed in many localities, and the sanitary survey of cities and towns has reached quite respectable proportions.

JOHN H. RAUCH, *Secretary*.

On motion of Dr. Clark, the report was received and ordered printed.

The Secretary called attention to the terms of the act passed by the last General Assembly, and moved that the BOARD proceed to organize in accordance therewith, the officers and committees of the old organization to be continued. The motion was adopted.

Dr. Rauch moved that the seal of the late organization be adopted; carried: and also moved that the BOARD reaffirm all the acts of the STATE BOARD OF HEALTH had under the act in force July 1, 1877; adopted.

On motion of Dr. Kreider, the following resolution was adopted:

Resolved, That this BOARD reaffirms the action of the STATE BOARD OF HEALTH taken on the 21st day of May, 1885, in revoking the certificate of John C. McCoy, better known as J. Cresap McCoy, on charges of unprofessional and dishonorable conduct then presented, and the findings against him on such charges.

On motion of Dr. Clark, the President of the BOARD was empowered to appoint delegates to the International Conference of State Boards of Health, to be held at Washington, D. C., in September next.

The Secretary presented the applications of sundry itinerant vendors of drugs, nostrums, etc.—8 in number. After a full discussion of the subject, Dr. Kreider offered the following resolution, which was adopted:

Resolved, That the applications now pending by itinerant vendors of drugs, nostrums, etc., for license to sell and the tender of the fee of \$100 per month for each such license, be declined in the exercise of the discretion vested in this BOARD by section 11 of the Act to Regulate the Practice of Medicine—such itinerancy and the manner of vending being deemed prejudicial to the public welfare.

Dr. Mackenzie offered the following resolution, which was adopted:

Resolved, That conviction of the charge of criminal abortion performed or procured by a practitioner of medicine or midwife, shall be held as cause for the refusal or summary revocation of the certificate of this BOARD.

At the afternoon session, Dr. Clark presented the following resolution, and the same was adopted:

Resolved, That the phrase “medical colleges in good standing,” in the first section of the Act to Regulate the Practice of Medicine, approved June 16, 1887, is hereby defined to include only those colleges which shall, after the sessions of 1890-91, require four years of professional study, including any time spent with a preceptor, and three regular courses of lectures, as conditions of graduation, and shall otherwise conform to the Schedule of Minimum Requirements heretofore adopted by the BOARD.

On motion of Dr. Mackenzie, the Secretary was instructed to prepare forms for weekly mortality reports, for the use of localities where returns of deaths are made.

During the remainder of the session, matters pertaining to the Medical Practice Act were considered, the usual routine business was transacted, and bills for the quarter, amounting to \$3,175.26, were audited and ordered paid.

Adjourned.

SPECIAL MEETING, CHICAGO, AUGUST, 1887.

A special meeting of the ILLINOIS STATE BOARD OF HEALTH was held at the Grand Pacific Hotel, Chicago, August 11, 1887, to consider the charges against Henry G. Wildman, of Chicago, for “unprofessional and dishonorable” conduct.

Present—Drs. A. L. Clark, R. Ludlam, W. R. Mackenzie, and John H. Rauch; and in addition to the foregoing members of the BOARD there were present Hon. John M. Hamilton, attorney for the BOARD, and Henry G. Wildman and his attorney, William Brown.

Dr. Clark was chosen President *pro tem*.

The charges against Wildman were read, also his reply thereto, and after discussion of the points at issue by the counsel and members of the BOARD, and a refusal of Wildman to testify in

his own behalf before the BOARD, the following resolution, on motion of Dr. Ludlam, was unanimously adopted:

Resolved, That the certificate heretofore issued to H. G. Wildman by this BOARD, entitling him to practice medicine in Illinois, be and is hereby revoked for "unprofessional and dishonorable conduct."

Adjourned.

QUARTERLY MEETING, CHICAGO, OCTOBER, 1887.

THE regular quarterly meeting of the ILLINOIS STATE BOARD OF HEALTH was held at the Grand Pacific Hotel, Chicago, on Tuesday, October 18, 1887. Present during the session: Drs. W. A. Haskell, President; Newton Bateman, A. L. Clark, W. R. Mackenzie, H. V. Ferrell and John H. Rauch, Secretary. Dr. G. N. Kreider, of Springfield, having resigned, Dr. H. V. Ferrell, of Williamson county, who had been appointed by the Governor as his successor, was also present.

The minutes of the regular quarterly meeting in July, and of the special meeting in August, were read and approved.

Upon call of reports from officers the Secretary presented the following:

QUARTERLY REPORT OF THE SECRETARY.

During the quarter ended September 30, 1887, there were received in the Secretary's office 1,798 written communications of all kinds, and a total of 1,050 were sent out. Of printed matter there were distributed 143 copies of the various Annual Reports, 47 Official Registers, 24 copies of the Report on Medical Education, 7,200 copies of the Report of Proceedings of the July, 1887, meeting of the BOARD, which contained, also, the new law regulating the practice of medicine, in force July 1, 1887, and the usual number of the various publications of the BOARD, Preventable Disease circulars, etc.

Certificates and Licenses:

There were issued 103 certificates to physicians during the quarter; 84 to graduates upon diplomas from medical colleges in good standing; 1 upon examination; 14 to non-graduates upon proof of ten years' practice in the State prior to July 1, 1877, and 4 duplicates upon proof of destruction of originals. Certificates were also issued to 25 midwives; 10 upon diplomas or licenses, 12 upon examination, and 3 upon years of practice.

The unusually large number of certificates issued—greater than ever before during the third quarter of any calendar year since the BOARD was organized—is due to the operation of the new Medical Practice Act, which has brought all physicians under the

provisions of the law, without regard to length of practice in the State. Of the 103 certificates issued, no less than 38 were to practitioners previously exempt, 24 to graduates and 14 to non-graduates who were not required to take out certificates under the act of 1877. More applications for certificates (60 in all) have also been deferred for the action of the BOARD, or, definitely rejected, than during any corresponding period since 1878. This result was to be expected, since the great majority of skillful, qualified physicians had complied with the law of 1877 and were already duly certificated. While there were a number of physicians of the same reputable character and attainments as these, in the small minority remaining, there were many of a very different class who were exempted from supervision by the ten years' prior-practice clause of the old law. These are now required to hold the certificate of the BOARD as a guarantee of their moral and professional fitness to practice medicine, and it is mainly from these that the rejected or deferred applications have come. These applications have been deferred or rejected because the applicants are unable to comply with the law. The papers in the 60 cases of this class, which have arisen during the quarter, will be submitted to the BOARD for its action during the meeting.

The New Medical Practice Act:

Although entailing an immense amount of detail labor, and giving rise to many perplexing questions, the results of the operation of the new Act to regulate the Practice of Medicine thus far have been fairly gratifying. A number of suits for violation of its provisions have been brought locally against quacks and other disreputables. In 11 of these the suits have been pushed to a successful conclusion. Among them was the case of one A. E. Geismardo, extensively advertised as "the famous and renowned electric and magnetic healer from Paris, France." This was a quack of the usual and well known type. By lavish advertising he did a thriving business for a time, one of his devices for securing an appearance of popularity being to advertise for a lady attendant to take charge of his rooms and establishment. This brought scores of applicants who were supposed by the uninitiated to be patients seeking the famous healer's wonderful touch. As soon as the necessary legal evidence could be secured the fellow was arrested, tried, convicted and fined \$100. He, however, succeeded in duping one of his patients—a lady with some money—into marriage, and after a short career as a theatrical manager, he went to St. Paul, where the wronged and outraged woman left him. Had this case been given publicity in the newspapers the marriage might have been prevented.

The first of the class of frauds known as "clairvoyants" has also been dealt with during the past quarter. A "Mrs. Dr. Frances," of No. 11 Carpenter street, Chicago, advertised in addition to her alleged clairvoyance, to be possessed of a magic cure and certain salves. The necessary evidence was secured, but before trial the woman left the city for Indianapolis.

One of the most signal benefits of the new law has been already demonstrated in practically ridding the State of the itinerant nostrum vendors, with their brass-band, concert-troupe, and "wild-west-show" adjuncts. Some of these concerns are organized on a regular circus scale, and spend money lavishly in lying and fraudulent hand-bills, posters, circulars and pamphlets, besides the advertising columns of the newspapers. They have fleeced the public annually of thousands of dollars by their specious and demoralizing devices, addressed to the credulous and afflicted.

On the 1st of July there were twenty of these itinerant shows in different parts of the State, and fees amounting to \$1,500 per month have been tendered for licenses authorizing them to continue. Under the resolution adopted by the BOARD at the meeting of July 8, exercising the discretion conferred by section 11 of the new law, these licenses have been uniformly refused, on the ground that such itinerancy and the manner of vending are prejudicial to the public welfare. At the close of the quarter there were only two of this class of charlatans left in the State, and the necessary proceedings have been already begun to secure their conviction or compel them to abandon Illinois as a field for their efforts.

Medical Education:

Notwithstanding that so much time has been necessarily devoted to matters arising under the new legislation, the other branches of the office work are in a satisfactory state of forwardness. The manuscript, tables, etc., for the Ninth Annual Report are complete, as is substantially the material for the Fifth Official Register of Physicians. The revision of the Report on Medical Education is almost perfected, and the tables and conclusions will be submitted for the information of the BOARD during the meeting. A period of ten years is now covered by this report, and the data concerning 258 medical colleges of all classes, and an aggregate of over 116,000 medical students, including some 37,000 graduates, are embraced in its successive editions.

One of the most striking features elicited by this research and its mass of facts and figures is the cumulative evidence afforded of the influence of the action of this BOARD upon the subject of medical education throughout the United States. In 1880 the BOARD announced its adoption of a Schedule of Minimum Requirements, compliance with which Schedule should be the condition of "good standing" of any given medical college after the sessions of 1882-83. At the former date, 1880, the percentage of graduates to matriculates was about 35, and it has now fallen to 30.5. The improvement is even more marked in the regular schools, in which, during the sessions of 1881-82, immediately following the announcement of the BOARD, the proportion of graduates to matriculates was 35.8 per cent. During the last sessions this percentage was 28.8, showing an improvement, numerically expressed, of over 18 per cent. in this respect. These

changes are still more significant when it is considered that the exaction of a preliminary education, and the longer term of study, attendance on clinics, laboratory work, etc., have excluded on the one hand a large number of those primarily unfit for the study of medicine; and, on the other hand, have given the graduates a more thorough training and higher qualifications for the practice of their profession. The extent to which this process of exclusion of the unfit has been carried is shown in the total numbers of those engaged in the study of medicine in 1882-83 and in 1886-87 respectively. During the first mentioned period there were 13,088 matriculates reported at the various colleges. At the last sessions, notwithstanding the growth of population, there were only 12,939 in attendance. Other figures show equally gratifying improvement in other directions.

Owing to the complications in connection with the printing contract, the printing of these reports, etc., is necessarily deferred. The Secretary would suggest, however, that the Report on Medical Education is of such general interest to the profession throughout the country that its publication in abstract in one or more medical journals would be warranted, and authority is therefore asked for this action.

The Public Health:

Since the last meeting of the BOARD the matter of the greatest moment to health officials and health boards everywhere in this country has been the arrival of the cholera-infected steamer *Alesia* at the port of New York, on September 25. With the general facts concerning this arrival, and the action of the New York quarantine officers in the premises, the BOARD and the public have been advised by the daily press, and it is not necessary to rehearse these details in this connection. It is too early to assert that all danger is now past from this arrival. So far as the developments go, the occurrence is a sufficient justification of the action of the BOARD in empowering its Secretary more than two years ago to make an inspection of the quarantines maintained on the Atlantic and Gulf coasts, with especial reference to the exclusion of Asiatic cholera and small-pox. In the introduction to that report, made early in 1886, it was said that:

These outer lines even with some defects and weak places, I believe to be even now sufficiently strong to keep out the disease if proper vigilance and thoroughness be exercised, if all the facilities be utilized, and if timely notification of threatened danger be given by the National government. The next year or two, however, will furnish a tolerably conclusive test of the efficiency of quarantine to exclude the pestilence from this country.

More than a year before this report, in an address at the opening of the National Conference of State Boards of Health, held in St. Louis, Oct. 13, 1884, it was urged that:

Congress should give the President the power to issue a proclamation, upon the recommendation of the National health authority, forbidding immigration into the United States from infected districts of other countries, and it should provide some method of international sanitary cooperation between this country and the Dominion of Canada, whose interests are substantially the same as ours in these matters, and whose contiguity makes cooperation of vital importance.

These important matters are yet neglected, nor is there any provision for timely notification of threatened danger by any

national authority. The Alesia arrived at a port where the quarantine regulations require every foreign arrival to be boarded and inspected before allowing the vessel to proceed to her dock. The existence of the cholera infection was thus promptly ascertained on this vessel, and the proper steps were at once taken to segregate the sick from the well, to place these latter in a quarantine of observation, and to isolate the former so as to prevent any spread of the disease from existing cases. Meanwhile approved cleansing and disinfecting processes were applied to the vessel, to the dunnage and personal effects of the crew and passengers, and to other material susceptible of being fomites. That these precautions were imperatively necessary is shown by the continued development for fully two weeks of new cases, among the apparently healthy isolated on Hoffman Island. Dr. Smith, health officer of the port, and with whom telegraphic communication has been maintained since the 26th of September, wired on October 11 the following summary of the situation:

Eight cases of cholera were removed from Alesia. Twenty-six have developed at quarantine of observation. Eight cases now in hospital. Seven likely to recover. No new cases during the past two days. Condition of immigrants encouraging. None will be discharged until all danger is past. Full passenger lists will then be published.

Thus it is seen that notwithstanding all the precautions that were observed, the disease continued to attack people removed as far as possible from all known sources of infection during a period of fourteen days.

Can it be doubted that, had certain theories of cholera and of quarantine obtained in New York harbor during the past few weeks—can it be doubted that these 26 cases, or a large proportion of them, would have been scattered throughout the country, each one to form a possible epidemic center?

Our Interest in Coast Quarantine:

It is, of course, this consideration that excites our interest in the administration of the coast quarantines. And it is gratifying to be able to announce that since making the inspection of these quarantines and publishing the report thereon, this consideration has been accorded a degree of weight by those in charge which it had never before received.

Dr. Smith is believed to have been prompt, explicit and candid in his telegraphic statements, and this belief has reassured the whole country. The interior has assumed that everything known to the best modern sanitary practice of quarantine was being enforced to prevent the cholera poison obtaining a foothold upon our shores.

But it must not be forgotten that there is no legal obligation on the part of Dr. Smith, or of any other health officer, to take such action in the interest of any but his own port and territory. In this connection it is proper to state that Dr. Montizambert, in charge of the Grosse Isle quarantine, below Quebec, writes the Secretary under recent date, forwarding a printed copy of the revised quarantine rules and regulations now enforced on the St.

Lawrence, and from which it is seen that the recommendations—as to quarantine practice, equipment, appliances, etc.,—made in the report already referred to, have been substantially adopted and carried out. This action materially increases the efficiency of one of the important safeguards of the interior, and there is no impropriety in citing it as one of the direct results of the quarantine inspection authorized by the BOARD in 1885.

In view of the manifestations of this pestilence during the past few months upon the Italian peninsula and in the Mediterranean, and the as yet uncontradicted assertion that it has reappeared in South America, everything pertaining to our coast defenses against introduction of the disease is of very vital interest.

Dr. Smith's last dispatch was as follows:

QUARANTINE, STATEN ISLAND, Oct. 17. —*Dr. John H. Rauch, Springfield:* Was absent at hospital. No new cases for several days at quarantine. All Alesia passengers convalescent with one exception.
WM. M. SMITH.

[During the session of the BOARD, information was received of the development of 4 cases of cholera upon the *Brittania*, a sister steamer of the *Alesia*. She arrived in New York bay on the 13th, and was detained at the upper quarantine station for observation until the 18th, when the disease was positively identified, and the vessel was at once taken down to the lower station to be treated as the *Alesia* was. This second arrival suggests the danger threatening the country from vessels sailing from ports of the infected Mediterranean to American ports where no facilities exist for quarantines of observation, isolation, etc.]

The outbreaks of yellow fever at Tampa and elsewhere in Florida have fortunately occurred too late in the season to give rise to much solicitude. The chief danger lies in the want of efficient health organizations throughout the territory affected, and the consequent probability of neglect to properly deal with infected material and localities. Such neglect may give rise to other outbreaks, or even an epidemic next year.

Health in Illinois:

Although the public health of Illinois and the country generally has remained in a fairly satisfactory state, conditions obtained during the past summer which caused grave solicitude. The intensely hot weather of July, and the prolonged drought were among the more important of these. The great prevalence of diarrheal diseases and numerous outbreaks of typhoid fever—the former directly due to the high temperature, and the latter intensified by water supplies affected by the drought—were ominous of the results which might be anticipated if the specific poison of Asiatic cholera should be introduced. Fortunately this calamity was escaped, and the approach of cold weather assures us a further season of probable immunity from a cholera epidemic.

The only other noteworthy feature of the past quarter in this relation has been an extension of diphtheria, in many cases very malignant and fatal. The Preventable-Disease circular of the BOARD treating of this disease, has been for some time revised

for re-publication, but owing to causes already set forth, it has not yet been printed. Authority is asked to have an edition of 5,000 copies struck off by private contract with the lowest bidder, the expense to be defrayed from the general funds of the BOARD.

JOHN H. RAUCH, Secretary.

In accordance with the recommendations of the Secretary in his quarterly report, authority was granted him to have printed 5,000 copies of the Preventable-Disease Circular on Diphtheria, and to print in abstract, in one or more medical journals, the Report on Medical Education for 1887, the cost thereof to be paid from the general expense fund of the BOARD.

In the matter of the application of Geo. W. Bock, of Quincy, for a certificate, the following resolution, offered by Dr. Bateman, was adopted:

Resolved, That in the matter of the renewed application of Dr. Geo. W. Bock for a certificate, further and final consideration of said case be deferred until the next (January) meeting of the BOARD.

In the matter of the application of one H. D. Flower, of Fulton, Whiteside county, for the certificate of the BOARD, authorizing him to practice medicine and surgery in the State of Illinois, sundry documents and papers were submitted, and on the showing made THE BOARD declined to issue a certificate.

On motion, action in sundry other cases in connection with the Medical Practice Act was postponed to a future meeting.

Charges affecting the good standing of a medical college were submitted to the BOARD, and after due consideration the following preambles and resolution were adopted:

WHEREAS, At a meeting of the BOARD, held in the City of Chicago, one year ago, charges affecting the good standing of the — Medical College were investigated, the school being represented by a member of the faculty; and

WHEREAS, It was then agreed that if the College corrected the abuses complained of, no action would be taken by this BOARD; but conclusive evidence having been furnished to the BOARD that the College failed to carry out its own printed requirements, and those of this Board; therefore, be it

Resolved, That this BOARD can no longer consider said College in good standing under the provisions of the Medical Practice act in force in the State of Illinois.

In the matter of the recognition of the Chicago College of Midwifery, the BOARD took no formal action, merely deciding not to commit itself in advance of the presentation of any of its diplomas.

The auditing committee reported bills amounting to \$2,632.13, and recommended that they be paid, and it was so ordered.

Adjourned.

SUMMARY OF OFFICE WORK AND MISCELLANEOUS.

The total correspondence of the Secretary's office during the year 1887 embraces 11,040 letters, etc., of which 6,713 were received and 4,327 were dispatched. Of the publications of the BOARD there

have been distributed during the year 2,673 copies of the Annual Reports and Official Registers; 8,000 copies of the Quarterly Reports; 5,000 vaccination certificates; 2,000 blanks for vital statistics and accompanying circulars of instruction, besides a large number of Preventable Disease circulars, Public Health Laws and Sanitary Memoranda and other publications of the BOARD.

The Ninth Annual Report, a volume of 351 pages, including an appendix containing reports on the State Sanitary Survey, Vital Statistics and Coroners' Inquests, Meteorological Tables, and State Medicine in 1886, has been prepared.

Certificates and Licenses:

During the year 485 original and 13 duplicate certificates authorizing the practice of medicine were issued. Diplomas presented by 31 graduates of seven different colleges were required to be supplemented by examinations of the applicants on branches or subjects omitted by the respective schools; and in 6 similar cases the applicants declined to appear for examination and left the State. In addition to these, 69 applications were refused owing to the inability of the applicants to comply with the terms of the Medical Practice Act or the rules of the BOARD based thereon. Of the total 485 original certificates issued, 434 were to graduates of medical colleges; 44 to practitioners of ten or more years' practice prior to July 1, 1877, and 7 to candidates upon examination. The certificate of 1 practitioner was revoked for "unprofessional and dishonorable" conduct. To midwives during the year 95 original certificates were issued; 36 being to licentiates; 36 upon examination, and 23 upon years of practice in this State. Seventeen applications were refused, mainly because of failure to pass the prescribed examination.

Cholera and Quarantine at New York:

In view of the very general interest which has been aroused throughout the country by the recent occurrences at the New York quarantine, and the danger—now happily averted—of an immediate invasion of Asiatic cholera through Italian immigrants, it seems proper to give this subject precedence in the report of the Secretary. As part of the history of the introduction of the contagion into New York harbor in the fall of 1887, and of the action of this BOARD in the premises, the following telegrams, correspondence and statements of fact are submitted:

The steamship *Alesia* from Italy, arrived at New York on Sept. 23, 1887, having cholera patients on board. Upon the receipt of the first information concerning the *Alesia* I telegraphed Dr. W. M. Smith, the health officer of the port of New York, asking the status of affairs. He replied as follows on September 24:

No new cases to-day. Eight in hospital. Five hundred and fifty immigrants under observation at Hoffman Island. Have no apprehension of disease reaching the city.

To this the following response was sent on the 26th:

Thanks for telegram. What is the status to-day? Hope your expectations will be realized. Incur no risk. Allow no passengers or baggage to enter New York until you are perfectly satisfied there is no danger. The quarantine system of the port of New York is now on trial. The season of the year is favorable and with the facilities at hand no spread of the disease should occur beyond those that have been on the vessel.

On October 10th, the following telegram was addressed to Dr. Smith:

What is the cholera status? When will you discharge the Italian immigrants? Where are they going? Think it very important that the health authorities of the localities to which they go should keep them under supervision. If any are sent to Illinois, I wish to know it.

To this he replied:

Eight cases of cholera were removed from Alesia. Twenty-six have developed at quarantine of observation. Eight cases now in hospital. Seven likely to recover. No new cases during the past two days. Condition of immigrants encouraging. None will be discharged until all danger is past. Full passenger lists will then be published.

An associated press dispatch soon after told of a very satisfactory inspection having been made by the New York City Board of Health, and, as I was then preparing my quarterly report for the October meeting, and was desirous of embodying the latest definite information as to the situation, I again telegraphed on Oct. 15, and on the 17th received the following:

Was absent at hospital. No new cases for several days at quarantine. All Alesia passengers convalescent with one exception.

Noting the detention of the Britannia, I sent the following telegram on Oct. 19:

What is the status to-day? Pleased with work so far. When will the Alesia immigrants be discharged? If any should come to Illinois please inform me. When did last cases occur among immigrants under observation?

Dr. Smith replied to the above:

But one case since night of the 7th among the Alesia's passengers. This was closely isolated before symptoms appeared, as several of the same family had cholera. Patients in hospital all convalescent.

The not entirely responsive character of this dispatch created some uneasiness, which was increased by the receipt, during the session of the BOARD, of an associated press dispatch, stating that four cases of cholera had appeared on the Britannia and that she had been ordered down to the lower bay. I promptly telegraphed, asking specifically if this statement was true, and late at night, I received this reply:

Not true. Britannia had three deaths on voyage, declared by surgeon not cholera. Symptoms of all three cases on ship not quite satisfactory. Vessel sent below to observe, clean up and disinfect.

Had I not received this dispatch it was my intention to take the action to which attention will be called later. A few days afterwards I learned of the inspection of Hoffman Island by Dr. John C. Peters, of New York, and his strictures upon the sanitary care of those under observation. Then came the information that the Independent's passengers had been relieved from quarantine after only one day's detention, and also that the quarantine commissioners had asked the treasury department if vessels from cholera ports could not be turned back. Finally came the report of the committee appointed by the College of Physicians and Surgeons of Philadelphia, commenting severely on the condition of the New York quarantine station.

Later, it having been announced that another vessel from a cholera port was on its way and that one of the quarantine com-

missioners was going to Washington to confer with representatives of the national government, it was deemed advisable to take the action indicated in the following communications as the only means which could be employed at that time to avert a possible danger:

Protection for Illinois:

The first of these letters was addressed to the Quarantine Commissioners of the port of New York:

ILLINOIS STATE BOARD OF HEALTH,

Springfield, November 5, 1887.

Gentlemen: In view of the present cholera situation, I would request that certificates be given to the Italian immigrants now in quarantine at the port of New York, and to those hereafter arriving from cholera-infected points, when they are released from quarantine, such certificates setting forth that the bearer is not suffering from cholera or choleraic symptoms; giving length of time under observation; and specifying that his or her clothing, dunnage and baggage have been thoroughly cleaned and disinfected. It is also requested that when any immigrants leave the quarantine station to come into or pass through the State of Illinois, you will please telegraph this office, the Health Commissioner of Chicago and the Health Commissioner of St. Louis, according to their destination. This Board feels that surveillance should be exercised over this class of immigrants after they arrive in this State, lest they might possibly become the means of spreading the disease. A letter will be addressed to the railroads coming into Illinois from the East, requesting them not to receive or transport these immigrants without the certificates above indicated.

I have the honor to be, very respectfully your obedient servant,

JOHN H. RAUCH, Secretary.

The second letter was sent to the presidents of four leading trunk lines of railroad, viz: The New York Central, the New York, Lake Erie & Western, the Pennsylvania Railroad Co., and the Baltimore & Ohio, and read as follows:

ILLINOIS STATE BOARD OF HEALTH,

Springfield, November 5, 1887.

Dear Sir:—I am directed by the ILLINOIS STATE BOARD OF HEALTH to request of your company that you do not receive, transport or bring into this State any of the Italian immigrants now in quarantine at the port of New York, or any that may come from cholera-infected points, without a certificate from the quarantine authorities stating that there is no danger in so doing. This request is made lest the Board might be required to exercise the quarantine power vested in it by law, and which would necessarily more or less interfere with the business of roads entering this State from the east. Hoping for your cooperation in this precautionary measure, I have the honor to be, very respectfully your obedient servant,

JOHN H. RAUCH, Secretary.

To the last letter the following replies have been received:

BALTIMORE AND OHIO RAILROAD CO.

Passenger Department.

Baltimore, Nov. 7, 1887.

DR. JOHN H. RAUCH,

Secretary State Board of Health,
Springfield, Ill.

Dear Sir:—Vice-President Spencer has referred to me your letter of Nov. 5, in regard to transporting into the State of Illinois any of the Italian immigrants now in quarantine at the port of New York, or that may come from cholera-infected ports; and in reply I beg leave to say that we will use every effort to prevent any of the class of persons indicated from procuring transportation via our line, and will cooperate with the other New York lines, and the health authorities of New York, to enforce any and all precautionary measures to prevent the spread of contagion.

Yours truly, C. K. LORD, Gen. Pass. Agt.

PENNSYLVANIA RAILROAD COMPANY,

Office of the President,

Philadelphia, Nov. 7, 1887.

DR. JOHN H. RAUCH,

Secretary State Board of Health,
Springfield, Ill.

My Dear Sir:—I am in receipt of your letter of Nov. 5, on the subject of transporting Italian immigrants now in quarantine in the port of New York into your State. You can rest assured that

our Company is heartily in sympathy with any proper policy that your Board of Health may indicate to the respective railroad companies that may be engaged in carrying the class of immigrants referred to. You will readily understand, however, that until some proper and concerted action is taken it will be impossible for our Company to act slily.

Very truly yours,

G. B. ROBERTS, President.

NEW YORK CENTRAL & HUDSON RIVER RAILROAD CO.,

Office of the General Passenger Agent,

New York, November 10, 1887.

JOHN H. RAUCH, Esq.,

Secretary Illinois State Board of Health,

Springfield, Ill.

Dear Sir:—Your communication of the 5th inst. to Hon. Chauncy M. Depew, President of this Company, in relation to the transportation of Italian immigrants from cholera-infected ports without a certificate from the quarantine authorities at the Port of New York to the effect that there is no danger therefrom, has been referred to me, with instructions to give your Board the desired assurance that this Company will do all in its power to prevent the transportation of any class of passengers from infected districts.

Very respectfully your obedient servant,

HENRY MONETT, Gen. Passenger Agent.

NEW YORK, LAKE ERIE & WESTERN RAILROAD CO.,

Office of the General Passenger Agent,

New York, November 11, 1887.

MR. JOHN H. RAUCH,

Secretary Illinois State Board of Health,

Springfield, Ill.

Dear Sir:—Your favor of the 5th inst. addressed to President King has been referred to me for attention, and I have the pleasure to advise that the question will be considered at meeting of New York Immigrant Committee to be held in this city on Tuesday next, when action in compliance with your request will undoubtedly be agreed upon. Trusting this will be satisfactory, I remain very truly,

L. P. FARMER, Gen. Passenger Agent.

N. Y., L. E. & WESTERN R'D, CO.

Office of General Passenger Agent.

New York, Nov. 18, 1887.

MR. JOHN H. RAUCH,

Secretary Illinois State Board of Health,

Springfield, Ill.

Dear Sir:—Referring to your favor of the 5th inst., the subject matter has been referred to the Board of Health for such information as will enable us to give you assurances with regard thereto.

Very truly,

L. P. FARMER, General Passenger Agent.

IMMIGRANT CLEARING HOUSE,

Office of Chairman,

New York, Nov. 22, 1887.

JOHN H. RAUCH, Esq.,

Secretary Illinois State Board of Health,

Springfield, Ill.

Dear Sir:—The Trunk Line Committee have had under consideration the subject raised in your letter of November 5th, to Mr. Spencer, Vice-President of the Baltimore & Ohio Railroad, and it has been referred to the Health Officer of the port, as well as to the President of the Board of Health of the City of New York. From these officials I learn that the fact of a discharge from quarantine is all the certificate needed, since there is no way in which an immigrant can enter the country without passing scrutiny at quarantine, and the voyage is always longer than the recog-

alized period of cholera incubation, so that if cholera has not developed until the examination at quarantine, there is no ground for anxiety. I am advised by the Health Officer that the passengers of the Alesia have all been discharged from quarantine, and that they are in person, clothing, and baggage, free from the infection of cholera.

Yours respectfully,

S. T. PIERSON,

Chairman Immigrant Clearing House.

To this last letter I replied as follows:

ILLINOIS STATE BOARD OF HEALTH,

Springfield, Nov. 25, 1887.

Dear Sir:—Yours of the 22d inst. at hand and contents noted. I do not agree with that portion of your letter in which you quote from the Health Officer of the port, and the President of the Board of Health of the City of New York, with regard to the discharges from quarantine being a sufficient guaranty that there is "no ground for anxiety." It may be so now, but it has not been so in the past, and even within the last two months. The State of Illinois has suffered repeatedly from the lapse of proper quarantine enforcement at the port of New York within my official experience, covering over twenty years. This Board does not claim control over the quarantine of the port of New York, but it does control the manner and circumstances under which immigrants from infected ports enter and pass through this State. By this mail I send you documents in which are marked passages bearing on this question, showing that I am not alone familiar with the introduction of cholera into this country in the past, but also with the details of quarantine management at every port in the United States.

Hoping that there will be no necessity for this Board to exercise its quarantine powers, I am very respectfully yours,

JOHN H. RAUCH, Secretary.

S. T. PIERSON, Esq., Chairman Immigrant Clearing House, New York.

Having noticed in the newspapers dispatches calling attention to the deaths from alleged cholera-morbus in New York city, I telegraphed on November 16, to Dr. W. DeForrest Day, Sanitary Superintendent and Registrar of Vital Statistics, of New York city, inquiring:

Is it true that deaths have recently occurred in your city from cholera-morbus? On November 5 I addressed a communication to the Quarantine Commissioner relative to the Italian immigrants in quarantine, but have had no reply. I do not understand this reticence. Letters were sent at the same time to the four trunk lines carrying immigrants from New York. All have replied promising hearty co-operation.

Dr. Day answered under date of Nov. 17:

A single fatal case of genuine cholera-morbus. No cause for fear.

Under date of November 17, the Health Officer of the port of New York, Dr. W. M. Smith, and on November 18 Dr. Lewis Balch, Secretary of the New York State Board of Health, furnished this office with a list of names of the immigrant passengers from the steamer Alesia, bound for Illinois and all going to Chicago. Immediately on receipt of the same, copies were sent to the Health Commissioner of Chicago. Under date of November 26, Dr. Smith sent me a list of names of immigrant passengers from the steamer Britannia, bound for Illinois and all going to Chicago; a copy of this was promptly forwarded to the Health Commissioner of that city.

Quarantine at New Orleans:

To the foregoing may be added the following concerning the quarantine action at New Orleans: Having learned that a steamer, said to be the Alesia, had arrived at New Orleans with immigrants from Palermo, Italy, I telegraphed Dr. Joseph Holt, President of the State Board of Health, of Louisiana, on December 7, as follows:

Is there any truth in the report that the Alesia has arrived at New Orleans from Palermo with over six hundred passengers from the cholera-infected districts of Italy?

To which Dr. Holt on Dec. 8, made reply:

Steamship Elysia left Palermo Nov. 6, with six hundred and fourteen immigrant passengers and an English surgeon on board. Clean bill of health. No case of sickness on voyage. Vessel exceptionally clean. Arrived at quarantine Dec. 4. Detained three days. Extra careful disinfection of every article of baggage, apparel and entire vessel. Reports of surgeon, captain and from Washington indicate no cholera in Italy during the past month.

On the same date I answered by telegraph as follows:

Regret that you did not detain the Alesia and her passengers longer. Cholera has twice been introduced into this country via New Orleans at this season of the year. No reliance is to be placed in the reports of the surgeon, captain and Washington authorities with regard to the existence of cholera in Italy during the past month. Why was the Alesia sent to New Orleans instead of New York?

Dr. Holt replied to the above on the same date:

I feel assured if you were here on the ground you would endorse our action. Positively no evidence unfavorable to steamer Elysia. Name not "Alesia." She belongs to a line to New Orleans. Every precaution taken.

While I am fully cognizant of the thoroughness and completeness of the sanitary measures for disinfecting and cleansing enforced at the New Orleans quarantine and have a high appreciation of Dr. Holt's executive and administrative abilities, I could not but regret that these immigrants were released from observation before the expiration of the period of incubation. They might have been suitably cared for during such detention in the buildings at the upper station and in *Pas a l'Outre*, supplemented by tents if necessary. My anxiety was, of course, increased by the name of the vessel, which was given as the "Alesia" in the first dispatches which met my eye.

It is but simple justice to Dr. Holt, to say that the vessel itself and its cargo and belongings and the personal effects, baggage, dunnage, wearing apparel, etc., of the passengers, officers and crew were made as safe, probably, as human agency could make them. But, in view of the fact that these six hundred and fourteen immigrants had come within a very short time from the same cholera-infected districts of Italy as the passengers of the Alesia and the Britannia, there could be no certainty that the seeds of the cholera-poison were not incubating in the systems of some of these people on arrival, and that there was some danger to them in the unpacking of their baggage. The only way to positively determine the negative of such a possibility would be by observation during the necessary period.

Public Health and the Immigrant:

These occurrences and the correspondence thereon very opportunely illustrate and emphasize the position I have held and the views I have promulgated upon the subject of quarantine for many years. Illinois, through the authority vested in its STATE BOARD OF HEALTH, may be protected against the consequences of the lapses and defects of the coast quarantines; but at a wholly unjustifiable expense and a regrettable but necessary interference with transportation interests. No interior State should be compelled in order to protect the health and lives of its citizens against foreign pestilences imported through the seaboard cities, to maintain a State line quarantine, to inspect the passengers on railways from such

cities, and otherwise to do, at great disadvantage and under very unfavorable conditions, what might much more readily, cheaply and efficiently be done at the port of arrival. THE ILLINOIS STATE BOARD OF HEALTH has exercised its quarantine powers only as a last recourse; and, when this exercise has been unavoidable every effort has been made to adjust its inspections and other agencies so as to conflict as little as possible with the interests of commerce and travel. On the other hand, the railroad managements have always responded to the BOARD in the most amicable spirit, with an intelligent appreciation of the necessities of the situation and a ready extension of every facility in their power in order to accomplish the desired result with as little friction as possible.

But the question naturally arises: Why should the State of Illinois be put to this expense, and with what justice can her transportation agencies be subjected to this burden? It is not her own protection alone that is thus assured, but the protection of the vast region beyond her borders—northwest, west and southwest—to which this great tide of immigration flows. Of the thousands of immigrants who enter the State annually—mainly through Chicago, as the great distributing point—only a small portion remain as permanent settlers; but the diseases, contagious and infectious, as well as the moral, social and mental wrecks of the whole number, are inflicted upon us in vast disproportion.

This consideration, however, is swallowed up in the larger view of the interests of the whole country, and the duty of the National Government to protect its borders from the invasion of foreign pestilence. And with regard to Asiatic cholera—whatever may be true of small-pox, scarlet fever or other contagious diseases—the events of the past few months only corroborate my conclusions; they have not modified, reversed or added thereto. I repeat what I have so often said before, as a practical sanitarian accustomed to deal with conditions as they actually exist, to-wit: That the only wise thing to do in respect of cholera is to resist the first beginnings. This country can be protected against the disease only by its absolute exclusion. The arguments against quarantine which may be valid enough for Great Britain do not apply here. The conditions which obtain are widely different. There is no great immigration movement into that country such as complicates the social, political and sanitary problems of this country. The only large bodies of people arriving in England after a long voyage are those on the troop-ships; but these are constantly under medical and sanitary surveillance, and on their arrival every fact of interest to the health officer is readily ascertainable, and the necessary measures may be enforced under the direct control of government.

The vast hordes of immigrants constantly arriving in this country present a sharp contrast in every respect. The voyage across the Atlantic is long enough to increase the susceptibility to contagious diseases under the conditions which obtain in the steerage; the sanitary supervision is defective; reports of the ship's officers

are untrustworthy; as is again shown in the case of the *Britannia*; and the methods of the immigrant carriers—whose object is to land the immigrant at his ultimate destination with as little delay as possible—are such as to greatly imperil the interior.

The immigrant and his effects are hurried through the port of arrival, and the first intimation of danger to an interior community is too often the outbreak of a virulent contagion. I have shown this to be true with respect to small-pox, in my paper entitled "Immigrant Introduction of Small-Pox into the United States" (see Fifth Annual Report of the ILLINOIS STATE BOARD OF HEALTH, pp 329–342. Also report of the National Board of Health, 1882.) During a period of nearly a third of a century I have traced the reappearance of small-pox in Chicago in every instance to first cases directly introduced by immigrants; and the last great small-pox epidemic—that of 1880-83—I have shown to be due to the same cause in ten different States and in over two hundred different instances.

Infected Household Goods of Immigrants:

The familiar citation of the epidemic outbreaks of cholera in 1873 in Ohio, Minnesota and Dakota—caused by the unpacking of the infected household goods, clothing, etc., of immigrants—might be supplemented by similar instances which came under my own observation during that year, while Sanitary Superintendent of Chicago. The first cases in that city were in three different families, who had received immigrants from Europe direct through the port of New York. (There was no cholera in New York city in 1873.) Members of these families were attacked by the disease within a short time after the arrival of these persons. The fact that the immigrants themselves escaped, threw the search for the origin of the cases into other directions; and I vainly sought to establish a connection between these outbreaks and the places then infected on the Mississippi river. It was not until after such connection was positively disproved that the right clew was discovered as above mentioned.

In view of the subsequent developments in the case of the *Alesia* and *Britannia* it can only be ascribed to great good fortune that the country escaped a similar result from her immigrant passengers. The number of cases which occurred after these were taken in charge by the quarantine authorities and the prolonged duration of the outbreak are conclusive proof that they were infected, not only in person but in belongings. If there had not been cases of the disease actually on board when the vessel arrived these infected belongings—baggage, dunnage, household effects, etc., packed up in the cholera districts of Italy—would have been passed through the port and rapidly carried into the interior, there to liberate the cholera poison whenever the goods were opened, as was the case in 1873 at Carthage, Ohio, in Kandiyohi county, Minnesota, at Yankton, Dakota and in the city of Chicago.

While this demonstrates the necessity for the thorough disinfection of all this class of articles coming from any country in-

fected with such a transportable contagion, the cases of cholera which continued to occur among the steerage passengers of the *Alesia* and *Britannia* so long after arrival, equally demonstrate the necessity for detaining such passengers during the recognized period of incubation of the disease. Given the existence of cholera in Europe, experience shows the impossibility of determining when or how the immigrant passengers may become exposed to infection during a voyage.

The terrible epidemic of 1848-50, which swept over the continent from the Atlantic to the Pacific, is attributed to the arrival at New Orleans in December, 1848, of the immigrant ship *Swanton*. This vessel cleared from the port of Havre on the 31st of October; and nine days later the *New York*—another immigrant ship—cleared from the same port for the port of New York. Havre was at the time declared free from cholera and both vessels cleared with clean bills of health. According to Hirsch cholera did not invade France until the first months of the following year, when it first showed itself in the seaports along the northern coast. The steerage passengers on these vessels, however, were mostly immigrants from Germany, into which country—according to the same authority—cholera was brought from Russia in the early summer of 1848.

On the 24th of November, being then fifteen days out from Havre with all well on board, the *New York*, in north latitude 42° off the United States coast, encountered a very cold wind which, in the language of the captain, caused "a general overhauling of baggage for warm clothing." Twenty-four hours later the *Swanton*, a thousand miles south of the *New York*, (in latitude 25° 41') was "visited by a very hot southeast wind; such a one," says her captain, "as I had never felt before." Cholera broke out on the *New York* November 25th, and on the *Swanton* November 26th. The former vessel arrived in New York bay December 2d, having lost fourteen of her passengers, and the latter reached New Orleans December 11th, having had thirteen deaths.

There is no escape from the conclusion arrived at by Dr. Alonzo Clark, after a critical consideration of the various theories advanced to account for the outbreaks on these vessels: "It seems to me far more probable that the poison was lurking in the baggage of these passengers, and that the emergencies which required the opening of unventilated trunks and packages, let loose in each of these ships that poison brought from the infected regions of Germany."

Had this unpacking of baggage occurred later in the voyage the vessels might have arrived without any suspicion of infection; and under the present system of local maritime quarantines, they would at most have been detained only long enough to disinfect the vessels, baggage, etc. Manifestly, since it is impossible to disinfect the individual who may have already received the seeds of contagion into his system, the only security for the country is in

the detention—for the full period of incubation after arrival—of all European immigrants so long as Asiatic cholera continues to exist in any part of Europe.

Prohibition of Immigration:

The alternative to these precautions is in the prohibition of all immigration from cholera infected districts during the existence of a cholera epidemic. This might be done by giving the President authority to issue a proclamation to such effect, as I have already suggested in my address before the National Conference of State Boards of Health in 1884.

The occurrences of the past few months fully confirm all that I have hitherto said upon this subject. Maritime quarantine can be efficiently administered only by the National Government, and its cost should be defrayed from the National treasury, since it is a measure of sanitary defense for the whole country against the invasion of foreign pestilence. A short cut to the same result may be had by shutting out the immigrant himself, and with him all the other ills which the steerage, like a veritable Pandora's box, has let loose upon this country. As I have elsewhere said: It is the steerage of the immigrant vessel with the poverty, squalor and uncleanness of too many of its denizens, with its crowd-poison and other conditions favorable to the development of the specific contagions, which we, as sanitarians at least, have to fear and guard against.

If congress can be induced to give the subject the consideration which its importance to the well-being of the republic demands, it would be well to inquire into the feasibility of restricting the entrance of immigrants to those ports only which may be provided with proper facilities for their inspection, detention when necessary, and other treatment adequate to effectually prevent their carrying contagion into the country either by themselves or their belongings. And in this connection it seems proper to observe, in view of recent developments, that the language employed in my "Report of an Inspection of the Atlantic and Gulf Quarantines" with reference to the quarantines at New York and at New Orleans was well considered. I then, in the fall of 1885, wrote: The quarantine plant and facilities at the port of New York are unrivalled, etc. That the "plant" has not been maintained in the condition it was when first constructed, and that the "facilities" have not been utilized, do not surprise those familiar with the situation. The result witnessed in the fall of 1887 is foreshadowed in the concluding paragraph of my report on this station: "New York *may* exclude cholera under her present system; but more confidence would be reposed in the result if less were demanded of professional ability, personal integrity and executive firmness in the health officer, and if the system were freed from influences which are most deprecated by those who, without prejudice, best understand them." In short, the sanitary efficiency of the New York quarantine has been interfered with to a serious extent by political influences.

The New Orleans Quarantine Endorsed:

With regard to New Orleans: I still endorse the claim made, that it "is the most thorough and vigorous system of sanitary quarantine which has ever been enforced for the protection of a port from the introduction of foreign contagion." But from what has been already said in the preceding it is obvious that I do not believe that any amount of sanitation—of disinfection, cleansing, etc.—will suffice to exclude such a capricious disease as cholera. There is absolutely no safety for this country in allowing immigrants from Europe—so long as cholera exists anywhere on that continent—to land on our shores until having complied with the following conditions:

First—The vessel to be taken charge of by the quarantine authorities immediately on arrival and released only after she is put in a perfect sanitary condition.

Second—The thorough cleansing and disinfection of all personal belongings of passengers, officers and crew—coupled with a detention of observation long enough to cover the recognized period of incubation of the disease after arrival.

Fortunately, there have been, as yet, no cases of cholera developed among or from the immigrants allowed to land and travel into the interior from these various vessels, and it is probable that whatever danger there may have been from these is now past. Occasional cases of cholera still occur in Southern Europe, and experience, both remote and recent, forbids a positive conclusion that the epidemic has run its course in that country; while we know that it has again reappeared in Chili, and is now raging at Santiago, and its extent in South America can only be conjectured.

Water Supplies and the Pollution of Streams:

Turning from this consideration of the subject to our own duty as a State Board of Health, the occurrences above dwelt upon fully justify all the efforts made during the past four years to perfect the sanitary condition of the State, and emphasize the necessity for their further continuance. The results of the unparalleled drought of the past year demonstrate the importance of a vigorous prosecution of the investigation into the sources of and remedy for the pollution of streams and the character of the water supply, not only of cities, towns, and villages, but of the country generally throughout the State. Coupled with the chemical and biological examination of water supplies, it is designed to utilize the data obtainable by collecting the various borings made in many parts of the State for coal, artesian wells, gas. These should indicate the character, extent, and availability of our sub-surface water supply, and the results of the study and research, while being directly in the line of sanitary interests, will be profitable from an economic standpoint. Only less important than the prevention of disease, and premature death thereby, would be the knowledge which should enable the farmers, stock-raisers, and others to remedy, as far as possible, the results of prolonged dry weather, and to supplement the ordinary sources of supply from the underground reservoirs.

Illinois, though suffering, has, fortunately, been spared the widespread diseases which have been caused by drought during the past year in neighboring States, but the mode of cholera propagation and the extent and severity of a cholera epidemic depending so largely upon the character of the water supply, we cannot rest satisfied until every community in the State is assured of the best attainable condition of this great sanitary necessity. Wherever typhoid fever spreads beyond sporadic cases, and wherever diarrhea and dysentery are unusually prevalent, it is safe to assume that Asiatic cholera may become epidemic if the specific contagion be introduced, and it will be wise to remedy the conditions which cause such spread and prevalence before the graver disease shall get a foothold.

Sanitary Surveys:

In addition to prosecuting this work during the coming season, the general sanitary labors, which have been on the whole satisfactorily pursued during the past year, will need to be stimulated and encouraged during 1888. Sanitary surveys of places where these have not yet been undertaken, and revision and utilization of those already made, are among the most useful agencies which the BOARD has yet devised for promoting general sanitation.

During the past year the surveys of Alton, Anna, Belleville, Beardstown, Carlinville, Collinsville, Freeburg, Mt. Vernon, Ottawa, Rockford, Rock Island, Springfield, Streator, Tuscola, and Urbana have been completed, and are now in possession of the Board awaiting publication. The data contained in these surveys are not confined to sanitary matters alone, but there is much information pertaining to every locality which has never before been collected, and is nowhere else accessible. There is a marked improvement in the completeness and thoroughness of the work done during the past year in this direction. This is, no doubt, largely due to the publication of the sanitary surveys in the eighth annual report of the BOARD. These have obviously been studied and profited by, and it is a source of regret that the publication of the ninth annual report—the matter for which has been for some time ready for the printer—has been so long delayed through the complications in the public printing.

Health of the State:

Localized outbreaks of diphtheria and scarlet fever have been reported from a number of places during the closing quarter of 1887, but with no special tendency to epidemic spread. Want of proper and efficient municipal sanitary organization has prolonged the existence of the former disease in Belleville and of the latter in Quincy. Diphtheria is reported at Beardstown, Belleville, Blair, Edwardsville, Elmhurst, Nokomis, Rockford, Sadorus and near Sparta; scarlet fever at Chester, Mount Sterling, Nokomis, Quincy, Rockford, Saunemin and Sparta; typhoid fever and "milk sickness" near Nokomis, and neighborhood of Potomac, and a group of cases of typho-malarial fever at Downs.

A case of small-pox developed in the person of a railroad conductor on his return to Clinton, (DeWitt county), from an excursion into Mexico, where he undoubtedly contracted the disease. A case of varioloid has also occurred at Decatur. The source of the contagion in this latter case has not yet been determined. The usual precautions prescribed in the Preventable-Disease circular of the BOARD have been enforced at these places and the local authorities do not anticipate any spread of the contagion at Decatur. The conductor at Clinton is convalescent, but his three children have contracted the disease. Every effort is being made to confine the disease to this one family.

Another edition of the circular on Scarlet Fever, with some few revisions, has been prepared during the quarter and is now ready for distribution.

An Aggravated Case:

On the 3d of November, (1887) an appeal was received asking the BOARD to take action on behalf of one Isaac Hileman, an old soldier, invalid and almost totally blind. He was then temporarily residing at Ashland, Cass county, to which place he had gone for medical treatment by Dr. G. B. Black, an itinerant practitioner. The facts in the case, as developed by the investigation of the Secretary, are set forth in the following affidavits from Hileman and his wife:

STATE OF IOWA
COUNTY OF BENTON. 1887.

Isaac Hileman, being first duly sworn, deposes and says that he is a resident of Belle Plaine Iowa; that he is an invalid, almost totally blind, being able to distinguish daylight from darkness with one eye only; that on the recommendation of a friend he was induced to go to Ashland, Cass county, Illinois, for treatment by one Dr. G. B. Black; that on or about the 7th day of October, 1887, he arrived at Ashland, Cass county, Illinois, and shortly thereafter was examined by the said Dr. G. B. Black, who pronounced his troubles "catarrhal" and "kidney"—the loss of eyesight resulting from the former—and stating that he could cure him, restoring his sight, and contracted to do so for the sum of \$350, guaranteeing a cure in four weeks time; that on the 11th day of October, 1887, he paid the said Dr. G. B. Black, \$117, and entered into the following instrument with him, to-wit:

ASHLAND, ILL., Oct. 11, 1887.

Received of Isaac Hileman \$117, to apply on a course of medical treatment.

In consideration of \$350, of which said sum is part payment, we, Black & Co., agree to give said Isaac Hileman a full course of treatment, under the care and personal supervision of G. B. Black, M. D., for the following disease: catarrh and kidney.

Said Isaac Hileman agrees to abide by the direction and guidance of G. B. Black, M. D., until cured, and when so cured, the balance to be paid for such course of treatment shall become immediately due and payable. *If at any time said patient shall fail to follow the directions of said G. B. Black, M. D., or submit himself for treatment, such failure shall release us from any obligation to continue the course of treatment, and the balance of the agreed price shall immediately become due and payable to Black & Son.*

[Signed.]

G. B. BLACK & SON,

[Signed.]

His
ISAAC HILEMAN.
Mark.

The said Isaac Hileman further states that he submitted himself at all times for treatment to, and followed the directions of the said Dr. G. B. Black, explicitly, for the period of four weeks; that during that time he paid the said Dr. G. B. Black the sum of \$300 on account and experienced no relief whatever from his troubles; that at the end of the four weeks time in which a cure had been guaranteed, the said Dr. G. B. Black, informed him that it would require at least two weeks longer to effect a cure, and demanded the balance of their contract (\$50), at the same time, as the said Hileman verily believes the said Dr. G. B. Black was preparing to depart from Ashland for parts unknown. The said Isaac Hileman further states that the said Dr. G. B. Black was assisted at various times in his treatment of him Hileman by his (Black's) two sons William and Henry

In presence of Lily Kostomlatsky.

G. HOFSTON,

Notary Public in and for Benton county, Iowa.

STATE OF IOWA,)
COUNTY OF BENTON.)

Mrs. Malinda A. Hileman, being first duly sworn, deposes and says that she accompanied her husband, Isaac Hileman, to Ashland, Cass county, Illinois, whither he went for treatment by one Dr. G. B. Black; that after the said Dr. G. B. Black had examined her husband he (Black) pronounced his (Hileman's) troubles "Catarrhal" and "Kidney" and contracted to cure the same for the sum of \$350, *guaranteeing a cure* in four weeks time.

[Signed.]

Her
MALINDA A. HILEMAN.

G. HOUSTON,

Notary Public in and for Benton County, Iowa.

On learning the above facts the Secretary explained to Hileman that Black, being an exempt under the ten year's prior-practice clause of the Medical Practice Act of 1877, was not within the present jurisdiction of the STATE BOARD; but that his sons, William and Henry, on the evidence offered, were practicing in violation of the law—they not being exempts nor having procured the required certificates. On November 8, the State's attorney, R. R. Hewitt, of Cass county, was consulted relative to the prosecution of these latter parties. He took immediate action in the premises, securing service upon William Black on the 10th, his brother, Henry, having in the meantime left for parts unknown. The trial was had November 15, before a justice of the peace in Ashland; but, owing to the swearing of the elder Black, a verdict was rendered for the defendant upon a technicality, and the case was promptly appealed by the State's attorney to the circuit court.

A careful reading of the agreement with "G. B. Black & Son," and which is filled out on a printed blank, shows that it is a receipt, contract and, practically, a promissory note, with a clause releasing the Blacks from any obligation, while binding Hileman to pay the full amount whenever, in their judgment, he might "fail to follow" their directions. The case is so clearly one of obtaining money under false pretenses that Hileman was advised to bring suit on this ground. This, however, he was unable to do for want of means. He was a physical wreck, away from his home among strangers, and had no money left for a law suit after paying out over \$300 to the Blacks, and for which he had received no benefit whatever. Under the revised law this class of exempts after January 1, 1888, are subjected to the same supervision as those who commenced the practice of medicine in this State since July 1, 1877.

Medical Education:

In order to remedy, as far as possible, the effects of the delay in the public printing—the cause of which has been already referred to—the following summary and tables are submitted from the report on Medical Education, which has formed a feature in the annual reports of the BOARD for several years past. The matter for this report, which has involved a great amount of labor, is ready for the printer, and as the value of its information would

be materially impaired by further delay it is deemed proper to make it public, to this extent at least, in the abstract here presented.

In brief, the data collected indicate a continued improvement in the methods and a still further heightening of the standard of medical education in this country—a marked and steady impetus to which, it may be fairly claimed, has been given by the ILLINOIS STATE BOARD OF HEALTH in its practical enforcement of a schedule of Minimum Requirements for medical colleges, conformity with which is necessary to insure recognition as in “good standing” for the purposes of the medical practice act. Also the annual publication of this report, the work of other Boards and the agitation of the profession in the same direction.

The text of the Report on Medical Education for 1887 contains the data of historical interest pertaining to 258 institutions, dating back to 1765; the last report contained such data for 253 institutions. It contains, also, all necessary information as to the title, location, addresses of corresponding officers, faculty, curriculum of study, length and dates of sessions, requirements for matriculation and for graduation, fees, number of matriculates and of graduates at each session since 1877—and other facts of interest concerning the 129 medical colleges now in existence. It also embraces the statistics of a total of 116,529 medical students, classified by schools of practice, by States, by individual colleges and by sessions for each year during the period 1877-78 to 1886-87, inclusive.

The changes noted by a comparison with the report of 1886 show a net gain of two regular schools and a loss of two eclectic schools; while the others remain unchanged. As compared with the conditions which existed prior to the enforcement of the Schedule of Minimum Requirements—that is, prior to the sessions of 1883-84—the report shows that there are now 114 colleges which exact an educational requirement of intending matriculates, as against 45 formerly—there being no change in this respect from the previous year; that 43 colleges now exact attendance upon three or more courses of lectures as against 22 formerly—being a gain of two over 1886—and 57 others make provision for a three or four years’ graded course; that hygiene is now taught in 114, and medical jurisprudence in 112 colleges, as against 42 and 61 respectively, prior to 1883. There is an increase in the average of lecture-terms from 23.5 weeks to 24.9 weeks during this period, and 114 colleges now have terms of five months or over, and 63 have terms of six months or over as compared with 101 and 42 respectively. There is only one medical college that has a course less than twenty weeks, the Medical College of Georgia.

The effect of this improvement in methods of instruction and of the higher qualifications demanded before graduating the student is best seen in the diminishing percentage of graduates to matriculates. The tables embraced in the report now cover a sufficiently long period—from 1877 to 1887 inclusive—and deal with large enough numbers—116,529 matriculates and 37,493 graduates—to

give them a positive value for this purpose. Errors arising from unusual or accidental conditions are largely cancelled or diminished in importance in these aggregates, and the inferences drawn may be accepted as fairly trustworthy.

The first fact of importance which arrests the attention in this comparison is that, notwithstanding the growth of population, the total number of medical students has never yet reached the proportions attained in 1882-3. The sessions of that winter were attended by 13,038 students; of 1883-4 by 12,763 students; of 1884-5 by 11,975 students; of 1885-6 by 12,311 students, and of 1886-7 by 12,948 students. Although there was a gain last year of 627 students over the attendance in 1885-6, the aggregate in 1886-7 was still 140 less than in 1882-3.

The effect of a higher standard of qualifications for graduation is further shown in the diminishing percentage of graduates to the total number of students. In 1882-3 out of every 1000 matriculates 322 were graduated, taking both the United States and Canada and all schools of practice into the account. In 1886-7 only 294 out of every 1000 matriculates were graduated. In the United States alone in 1882-3 out of every 1000 matriculates 331 were graduated, while in 1886-7 only 305 out of every 1000 matriculates were graduated.

The subjoined summary and tables will enable a further study of this subject to be made.

Summary of Medical Institutions and Students in the United States and Canada, 1877-1887, inclusive.

NOTES.—a. "Total number of Institutions" includes seven (7) examining and licensing bodies which do not give instruction, and three (3) schools which do not confer degrees.

b. Does not include those specified in Note a.

c. "Now" and "formerly" have reference respectively to the periods before and since the enforcement of the Schedule of Minimum Requirements, namely, the close of the sessions of 1882-83.

Respectfully submitted,

JOHN H. RAUCH,

Secretary.

In accordance with the recommendations of the Secretary relative to the investigation into the sources of and remedy for the pollution of streams, and the character of the water supply of cities, towns and villages, the following resolution offered by Dr. Ludlam, was adopted, to-wit:

Resolved, That the necessary preparations be made to carry out the recommendations of the Secretary in his Quarterly Report in regard to the investigation of water supplies and the pollution of streams, and also with reference to the sanitary surveys, with a view to placing the State in the best possible sanitary condition during the coming summer.

APPENDIX.

CORONER'S INQUESTS.*

Coroner's inquests held in Illinois for the year ended December 31, 1887, compiled by Alexander Woods, M. D., Coroner of St. Clair county, East St. Louis.

The number of Coroner's inquests held in Illinois and reported in 1885 was 2,124, and of this number 358 were suicides. In 1886, 2,345 inquests, of which 335 were suicides. In 1887, out of 2,398 inquests, only 288 were suicidal deaths; indicating that self-murder is on the decrease. The modes of death of the 976 suicides reported in the last three years have been: By shooting, 290; by poison, 259; by hanging, 205; by drowning, 106; by cutting throat, 62; by throwing self under railroad trains, 19; other modes, and not reported, 35. The poisons most used were morphine and rough on rats. The youngest suicide was a boy aged 11, who hung himself to escape punishment at school. The oldest was a man aged 82, who hung himself with an apron string, supposed to have been tired of life. The ratio as to sexes is 1 female to 4 males. More married persons than single commit suicide. Out of the 976 suicides, only 2 were colored, and they were convicts in the Joliet penitentiary.

Total number of bodies on which inquests were held..... 2,398

ILLINOIS ARMY BOARD OF MEDICAL EXAMINERS.

As a contribution to the history of the regulation of the practice of medicine by the State of Illinois, I submit the results of the work of the Illinois Army Board of Medical Examiners during the War of the Rebellion, gathered from the records of the Adjutant General's office, from reports and papers of Dr. H. A. Johnson, of Chicago, and from my own personal experience and observation.

Although, as shown in our reports on Medical Education, efforts had been made from time to time for more than forty years* to establish some test of fitness of those engaged or offering to engage in the practice of medicine, the creation of this Army Board and the work which it accomplished were the first practical results in this direction. From the hundreds of medical men who tendered their services with patriotic zeal—often with an excess of patriotism which obscured their recognition of the demands of military service—there were selected a corps of 660 surgeons and assistant surgeons, whose record as faithful, competent, and, in many cases, brilliant officers was not surpassed by any similar body engaged in the defense of the Union. It is not too much to say that the reputation for endurance, pluck and effectiveness which Illinois troops early won and sustained throughout the war was due in no small measure to the skill, forethought and devotion of the Illinois medical staff. This has been fully testified by the highest military authorities.

These gentlemen, impartially and conscientiously selected solely on the basis of personal worth and professional fitness, went into the service and the field more thoroughly equipped and better qualified for the discharge of their duties than did any other class of volunteer officers, either of the line or the staff. I very distinctly remember the impression created on my own mind when,

* "While still a territory and sparsely settled only along the river fronts and water courses of Southern Illinois, efforts were already being made by the pioneer practitioners to regulate the practice of medicine and to foster the cause of medical education. In 1817 an act of the territorial legislature—with a preamble reciting that 'well regulated medical societies have been found to contribute to the diffusion of true science, and particularly to the knowledge of the healing art'—divided the territory into two medical districts: all that portion of the territory lying east of the meridian line running due north from the mouth of the Ohio formed the Eastern Medical District, and that west of said line formed the Western Medical District."—For historical summary of these efforts see *Medical Education and the Regulation of the Practice of Medicine in the United States and Canada*: FIFTH ANNUAL REPORT OF THE STATE BOARD OF HEALTH OF ILLINOIS—p. 52 et seq.

after having served for some time in departments where Illinois regiments were scarce, a corps, composed almost entirely of our own State troops, was added to the command in which I was serving as Medical Director. The hospital staff and appointments were in excellent and effective order; the medical and surgical records were complete and intelligently kept; the sanitary discipline and police regulations of the camps were admirable; and, as a result, the proportion of "effectives for duty" was maintained much above the average—in striking contrast to regiments from other States in the same command.

This is said without invidiousness, and only as bearing upon the work of the Army Medical Examining Board—the first practical step in Illinois toward regulating the practice of medicine, under the authority of the State. It may also and properly be said, that the survivors of those who were thus selected returned to the State at the close of the war to speedily occupy the foremost places of professional and social influence in their respective communities. About 170 of these are still living in this State, but their ranks are rapidly thinning out, and it has occurred to me, while there is yet time, to put on record some account of the manner in which the medical staff of the Illinois contingent was provided, and a complete roster of the names of its members. This seems proper as a matter of justice and in the interest of history.

In the organization of the first brigade of Illinois troops the State legislature, in April, 1861, constituted a Medical Board to carry out the intent of a general order of the War Department, implied in the phrase which authorized the appointment of regimental medical officers "after having passed an examination by a competent Medical Board, appointed by the Governor of the State." This order was not mandatory, but permissive only, and it was left to the Governors of the several States to determine whether or not it should be carried into effect. In fact, it was not, in many of the States, made operative: and medical officers were appointed in some by a State officer known as the Surgeon General, and in other States by the Governors, on recommendation of regimental officers, civilians or politicians. In the former case, where the selections were made by the Surgeon General of the State, the appointments were for the most part wise, but not uniformly so; and, on the other hand, where there was no medical authority to discriminate between applicants, the two extremes of qualification were found—a few well qualified, and a large number of incompetents.

Gov. Yates, however, who early won the appellation of the "Soldier's Friend," by his devotion to those who went forth to battle, seized this opportunity for securing competent medical officers for the 200,000 men which Illinois sent into the field during the war. In one of his papers on this subject Dr. Johnson

tells the following incident, which well illustrates the attitude of our great "War Governor" toward the Army Medical Board:

[Extract from "Medical War Memories," by H. A. Johnson, M. D., Chicago, read before the Loyal Legion, Chicago, Feb. 9, 1888.—Page 8.]

"During the first week of our work a physician, an intimate friend of Governor Yates, came before the Board and was found so deficient that we could not recommend him even for assistant surgeon. We had already rejected several candidates of much pretension, and, as they were still in Springfield, and had to some extent the confidence of the colonels who had nominated them, a united effort was made to over-ride the action of the Board. We were represented as either ignorant or prejudiced, our examinations were characterized as technical, and our decisions influenced by personal friendship or by other unnamed motives.

"On the evening of the day when the Governor's friend was sent back, the Governor came to my room and asked why Dr. ——— had not been recommended. I told him that the Board gave the doctor a patient hearing, and that the answers to practical questions, as well as his written dissertation, made it impossible for us to ask for his appointment. That as we were made the judges of qualification, we must do our duty in that station in which it had pleased the Governor of Illinois to place us. He replied, 'I am extremely sorry that Dr. ——— has failed to pass, but I am not surprised.' Then turning to me he added, 'For our boys who go from home and its comforts to the battle-field and its dangers I want to do the very best I can, and I pledge you that I will commission no one as surgeon or assistant surgeon, whom you cannot recommend.' This promise he kept very faithfully, and, although for a few days there was a great clamor for the scalps of the Medical Board, there came from the executive chamber no further questioning as to the reasons for our action."

As first constituted, the Illinois Army Board of Medical Examiners consisted of Drs. N. S. Davis, of Cook county; Charles Ryan, of Sangamon county; Geo. W. Stipp, of McLean county; William M. Chambers, of Coles county, and Dr. Carpenter, of St. Clair county. Candidates were required to pass an examination before this Board and obtain its recommendation as a condition of appointment and commission. As time developed the need for further troops, and new calls were made, the Medical Board was reorganized June 14, 1861, under General Order No. 25 of the War Department. This new Board consisted of Drs. Hosmer A. Johnson, of Chicago; Henry Wing, of Collinsville; Henry W. Davis, of Paris; O. M. Bryan, of Sycamore, and Robert Roskotten, of Peoria. Dr. Davis was subsequently appointed surgeon of the 18th Illinois Infantry, and Dr. D. K. Green, of Salem, was appointed to fill the vacancy. Drs. Bryan, Stipp and Roskotten were promoted to the positions of brigade surgeon in the fall of 1861, and during the greater part of 1862 the Board consisted of Drs. Johnson, Wing and Green. In the fall of 1862, Dr. A. L. McArthur, of Joliet, and Dr. Daniel Brainard, of Chicago, were appointed to fill the vacancies created by the promotion of Drs. Bryan and Roskotten. Dr. Johnson, as president of the Board, continued to devote himself to this work, and to frequent inspections of the sanitary and medical condition of Illinois troops, as well as to active service in the field on occasion, until February, 1865, and the experience thus gained has since been continuously employed most usefully for the public and the profession in the broad field of preventive medicine and in the various health services of the city of his residence, of the State and the Nation. At the date mentioned, February, 1865, Drs. Johnson and Wing resigned. Dr. Rufus S. Lord, of Springfield, was appointed a member, and the Board was thenceforth, until the close of the war—two months later—composed of Drs. Brainard, Green and Lord.

Drs. Wing, Brainard, Green and Lord are long since dead, and Dr. McArthur recently; Drs. H. A. Johnson, N. S. Davis, W. M. Chambers, O. M. Bryan and Robert Roskotten still survive.

The first session of the permanent Board—appointed June 14, 1861—was held in the city of Springfield on the 18th day of June, 1861, when an organization was effected by the election of H. A. Johnson, president, and O. M. Bryan, secretary. Subsequently, upon the resignation of Dr. Bryan, Dr. Wing was elected secretary.

Soon after its organization the Board received a letter from the Secretary of War, instructing it to be governed by the "army regulations; to investigate carefully the physical ability, moral character and professional attainments of each candidate, and to report favorably for appointment or promotion, in no case admitting of a reasonable doubt." In order to accommodate the candidates, as far as possible, sessions of the Board were held at Springfield, Chicago, Cairo, Alton, and in the field. I quote the following verbatim from the report of the Board, made December 13, 1862, to Adjutant General Fuller, showing the work accomplished during the first nineteen months.

"The whole number of candidates whose names have been registered on our books is 793. The whole number examined, as reported in the list which accompanies this, is 495. Of these 159 have been recommended for the office of surgeon; 266 have been recommended for the office of assistant surgeon; and 70 have been rejected. In addition to these cases reported, a very considerable number of candidates, after a partial examination, have become conscious of their deficiencies, and have requested permission to withdraw their applications. This request has, we believe, in every case, been granted, with the understanding that it was not to be made a matter of record, and that they were in all respects to be considered as unexamined."

"There is still another class of cases in which the examinations are not yet completed. Men of good moral character and with the ability to be useful, but who are deficient in some one department of medicine or surgery, have, in several instances, been advised to withdraw for a time, and to devote themselves to study with reference to a further examination. These cases are still unrecorded. For convenience we may divide the candidates into three classes:

"1st. Those whose study and practice have made them familiar with the whole field of medicine and surgery. This class is necessarily very small, but the Board is happy to know that there are such men in the service.

"2d. Those who, assuming the title of doctor, have never received the first rudiments of a medical or surgical education. As a general rule, we have found their ignorance only equalled by their impudence. It is unfortunate that these men have often gained the confidence of regiments and the nomination of colonels to the exclusion of better but more modest applicants.

"3d. By far the larger proportion of those who have presented themselves have been men of moderate attainments, capable of much usefulness in private practice, but unaccustomed to study, and able only with difficulty to express their ideas or demonstrate their knowledge.

"In the examination of the first and second classes, but little time has been consumed, but in order to judge correctly of the third class, much patience has been necessary. The habits of mind, methods of reasoning, and probable action in any given case, have been subjects of study, and the Board has often been compelled to form a judgment not so much upon the actual knowledge developed in the examination as upon the evidences of good sense, sound judgment and adaptation to the service.

"The examinations have consisted in an investigation:

"1st. Of the moral character of the candidate.

"2d. Of his professional character.

"3d. His experience and adaptation to the work.

"4th. His knowledge of his profession."

During the war a total of 1,250 applicants were examined by this Board in the manner already described, and 664 were recommended for appointment and commission—188 as surgeons and 476 as assistant surgeons. Of these latter 118 were subsequently re-examined and promoted to the rank of surgeon.

The professional and personal character of the men thus selected was so high that—although many of them had not graduated in medicine, and consequently were without the diploma specified in the Medical Practice Act as entitling its possessor to the certificate of the STATE BOARD,—the credentials of this Army Medical Examining Board were accepted as proof of the qualifications required by the act, and the survivors in 1877 were registered as certificated physicians by the formal action of the STATE BOARD.

Of those who were commissioned, and whose names are found in the following roster, there were 184 surgeons, 278 first assistant surgeons and 180 second assistant surgeons. Of this number, 89 were promoted after examination from first assistant surgeons to surgeons; 32 from second assistant surgeons to first assistant surgeons, and 29 from second assistant surgeons to surgeons, making a total of 150 promoted. Eleven were promoted to the rank of brigade surgeons and assistant surgeons of volunteers.

There were six who were killed in action and while on duty; 21 died and 19 were discharged on account of physical disability, the result of disease contracted in the service; 71 surgeons, 104 assistant surgeons, and 28 second assistant surgeons resigned; 8 were dismissed the service*, one first assistant surgeon and seven second assistant surgeons.

Many of the assistant surgeons had charge of regiments, as it frequently occurred that the surgeons were on detached duty, or incapacitated on account of sickness. Sixteen of the second assistant surgeons were mustered out as hospital stewards and three as privates, because of the lack of opportunity to be mustered in as assistant surgeons. This occurred near the close of the war, and their muster out, as such, did not do the parties justice.

□As nearly as I can ascertain, of the total number who passed this Examining Board, there are only 240 now living. They will be found, as a rule, to be among the most reputable and prominent practitioners in the communities in which they reside. A roster of all who passed this examination is herewith submitted:

* Names omitted in the roster.

ROSTER OF SURGEONS CONNECTED WITH ILLINOIS REGIMENTS DURING THE REBELLION—INFANTRY.

REGIMENT.	NAME.	RESIDENCE.	DATE OF APPOINTMENT.	MILITARY HISTORY.

ASSISTANT SURGEON OF VOLUNTEERS.

Frezell, John H.	Jan. 9, 1865	Mustered out Aug. 5, 1865
-----------------------	--------------	---------------------------------

* This class of Surgeons was appointed by the President, after examination and recommendation by the Board of Examiners, and were assigned to duty at Brigade, Division, and Corps Headquarters, and also to the charge of general hospitals, as the necessities of the service required, and were under the immediate control of the Surgeon General of the Army. In 1862 the title was changed to Surgeon of Volunteers: After this date, candidates, upon successful examination, were commissioned as Assistant Surgeons of Volunteers. Another examination was necessary for promotion to the rank of Surgeon. There were thirty-seven of this class of medical officers from Illinois, four of whom had been connected with the Illinois Army Medical Examining Board, and twenty with Illinois regiments.

MEDICAL PRACTICE IN ILLINOIS.

AN ACT TO REGULATE THE PRACTICE OF MEDICINE IN THE STATE OF ILLINOIS.

Passed June 15, approved June 16, and in force July 1, 1887.

SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly,* That no person shall practice medicine in any of its departments in this State unless such person possesses the qualifications required by this act. If a graduate in medicine, he shall present his diploma to the STATE BOARD OF HEALTH for verification as to its genuineness. If the diploma is found genuine, and from a legally chartered medical institution in good standing, and if the person named therein be the person claiming and presenting the same, the STATE BOARD OF HEALTH shall issue its certificate to that effect signed by all of the members thereof, and such certificate shall be conclusive as to the right of the lawful holder of the same to practice medicine in this State. If not a graduate, the person practicing medicine in this State shall present himself before said BOARD and submit himself to such examination as the BOARD may require, and if the examination be satisfactory to the BOARD, the said BOARD shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

§ 2. The STATE BOARD OF HEALTH shall organize within three months after the passage of this act, it shall procure a seal, and shall receive through its secretary, applications for certificates and examinations; the President and Secretary shall have authority to administer oaths, and the BOARD to take testimony in all matters relating to its duties; it shall issue certificates to all who furnish satisfactory proof of having received diplomas or licenses from legally chartered medical institutions in good standing as may be determined by the BOARD; it shall prepare three forms of certificates, one for persons in possession of such diplomas or licenses, the second for candidates examined and favorably passed on by the BOARD, and a third for persons to whom certificates may be issued as hereinafter provided in section 12 of this act; it shall furnish to the county clerks of the several counties a list of all persons receiving certificates. In selecting places to hold its meetings, it shall, as far as is reasonable, accommodate applicants residing in different sections of the State, and due notice shall be published of all of its meetings for examination. Certificates shall be signed by all the members of the BOARD, and the Secretary of the BOARD shall receive from the applicant a fee of five (5) dollars for each certificate issued to such graduate or licentiate. Graduates or licentiates in midwifery to pay the sum of two (2) dollars for each certificate. All such fees for certificates shall be paid by the Secretary into the treasury of the BOARD.

§ 3. The verification of the diploma shall consist in the affidavit of the holder and applicant that he is the lawful possessor of the same, and that he is the person therein named. Such affidavit may be taken before any person authorized to administer oaths, and the same shall be attested under the hand and official seal of such officer, if he have a seal; and any person swearing falsely shall be deemed guilty of perjury, and punished accordingly. Graduates may present their diplomas and affidavits as provided in this act, by letter or by proxy, and the STATE BOARD OF HEALTH shall issue its certificate the same as though the owner of the diploma was present.

§ 4. All examinations of persons not graduates or licentiates, shall be made directly by the BOARD, and the certificates given by the BOARD shall authorize the possessor to practice medicine and surgery in the State of Illinois.

§ 5. Every person holding a certificate from the STATE BOARD OF HEALTH shall have it recorded in the office of the clerk of the county in which he resides, within three months from its date, and the date of recording shall be endorsed thereon. Until such certificate is recorded as herein provided the holder thereof shall not exercise any of the rights or privileges conferred therein to practice medicine. Any person removing to another county to practice shall record the certificate in like manner in the county to which he removes, and the holder of the certificate shall pay to the county clerk the usual fees for making the record.

§ 6. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him, with the date of the issue of the certificate. If the certificate be based on a diploma or license, he shall record the name of the medical institution conferring it, and the date when conferred. The register of the county clerk shall be open to public inspection during business hours.

§ 7. The fees for the examination of non-graduates shall be as follows: Twenty (20) dollars for an examination in medicines and surgery; ten (10) dollars for an examination in midwifery only; and said fees shall be paid into the treasury of the BOARD. If an applicant fails to pass said examination, his or her fee shall be returned. Upon successfully passing the examination the certificate of the BOARD shall be issued to the applicant without further charge.

§ 8. Examinations may be made in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

§ 9. The STATE BOARD OF HEALTH may refuse to issue the certificates provided for in section 2 to individuals guilty of unprofessional or dishonorable conduct, and it may revoke such certificates for like causes. In all cases of refusal or revocation the applicant may appeal to the Governor, who may affirm or overrule the decision of the Board, and this decision shall be final.

§ 10. Any person shall be regarded as practicing medicine within the meaning of this act who shall treat, operate on, or prescribe for any physical ailment of another. But nothing in this act shall be construed to prohibit service in cases of emergency, or the domestic administration of family remedies. And this act shall not apply to commissioned surgeons of the United States Army, Navy or Marine Hospital Service in the discharge of their official duties.

§ 11. Any itinerant vendor of any drug, nostrum, ointment or appliance of any kind intended for the treatment of disease or injury, or who shall, by writing, or printing, or any other method, profess to cure or treat disease or deformity, by any drug, nostrum, manipulation or other expedient, shall pay a license of one hundred (100) dollars per month into the treasury of the Board, to be collected by the STATE BOARD OF HEALTH, in the name of the people of the State of Illinois, for the use of said Board of HEALTH. And it shall be lawful for the STATE BOARD OF HEALTH to issue such license on application made to the STATE BOARD OF HEALTH, such license to be signed by the President of the Board, and attested by the Secretary of the Board, with the seal of the Board. Any such itinerant vendor who shall vend or sell any such drug, nostrum, ointment or appliance without having a license so to do, shall, if found guilty, be fined in any sum not less than one hundred dollars, and not exceeding two hundred dollars for each offense, to be recovered in an action of debt before any court of competent jurisdiction. But such Board may for sufficient cause refuse such license.

§ 12. Any person practicing medicine or surgery in the State without the certificate issued by this Board in compliance with the provisions of this act, shall, for each and every instance of such practice, forfeit and pay to the People of the State of Illinois, for the use of the said STATE BOARD OF HEALTH, the sum of one hundred (100) dollars for the first offense, and two hundred (200) dollars for each subsequent offense, the same to be recovered in an action of debt before any court of competent jurisdiction, and any person filing or attempting to file as his own the diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction shall be subject to such fine and imprisonment as are made and provided by the statutes of the State for the crime of forgery: *Provided*, that all persons who have been practicing medicine continuously for ten years within this State prior to the taking effect of the act to which this is an amendment, and who have not under said original act obtained a certificate from the said Board of HEALTH to practice medicine in this State, shall, upon proper application to said Board of HEALTH, receive such certificate, unless it shall be ascertained and determined by said Board of HEALTH that the person so applying for a certificate is of immoral character, or guilty of unprofessional or dishonorable conduct, in which case said Board of HEALTH may reject such application: *And provided*, that such application for a certificate shall be made within six months after the taking effect of this act; and all persons holding a certificate on account of ten years' practice shall be subject to all the requirements and discipline of this act, and the act to which this is an amendment, in regard to their future conduct in the practice of medicine the same as all other persons holding certificates; and all persons not having applied for or received such certificate within six months after the taking effect of this act, and all persons whose applications have for the causes herein named been rejected or certificates revoked, shall, if they shall practice medicine, be deemed guilty of practicing in violation of law, and shall suffer the penalties herein provided.

§ 13. Upon conviction of either of the offenses mentioned in this act, the court shall, as part of the judgment, order that the defendant be committed to the common jail of the county until the fine and costs are paid, and upon failure to pay the same immediately, the defendant shall be committed under said order: *Provided*, that either party may appeal in the same time and manner as appeals may be taken in other cases, except that where an appeal is prayed in behalf of the People no appeal bond shall be required to be filed, whether the appeal be from a justice of the peace, or from the county or circuit court, or from the appellate court. But it shall be sufficient, in behalf of the People of the State of Illinois, for the use of the STATE BOARD OF HEALTH, to pray an appeal, and thereupon appeal may be had without bond or security.

§ 14. All acts and parts of acts inconsistent or in conflict with this act are hereby repealed.

All parties holding certificates—not revoked—under the act in force July 1, 1877, are not required to procure new certificates under above act.

PREFATORY NOTES CONCERNING THE OFFICIAL REGISTER OF 1890.

There are embraced in this—the fifth edition of the Official Register of Physicians and Midwives in Illinois, revised to January 1, 1890—the names, postoffice addresses and other data necessary for the purposes of identification of 6,165 physicians to whom certificates have been issued by the STATE BOARD OF HEALTH under the Act to Regulate the Practice of Medicine. To this number are to be added some fifty practitioners who are graduates and who have not complied with the law of 1887, so that the number engaged in the practice of medicine in Illinois at this time is 6,215 of all classes.

Of the 6,165 certificated practitioners, there are 5,474 who hold certificates from the STATE BOARD OF HEALTH, based upon satisfactory proof of having received diplomas or licenses from legally chartered medical institutions and licensing bodies in good standing; 116 others are practicing under the certificates of the BOARD issued after satisfactory examination; and 575 are non-graduates, who have taken out certificates based on years of practice as required by the law of 1887.

For purposes of comparison, the following totals from each of the five registers are here presented:

	January 14, 1880.	December 29, 1881.	December 1, 1884.	February 9, 1886.	January 1, 1890.
Total number engaged in practice.....	6,029	6,037	6,148	6,115	6,215
Graduates and licentiates of medical institutions	4,282	4,488	4,882	5,098	5,524
Licentiates upon examination of STATE BOARD OF HEALTH.....	191	183	159	145	116
Exempts, non-graduates, certificated..	948	896	757	672	575
Exempts, not certificated.....	*608	*470	*350	*200	+0

* Since the completion of this Register, a careful examination has disclosed the fact that there were about fifty more non-graduates in the State than were supposed, consequently this number has been added in the above table to the number of "exempts, not certificated" for each of the years 1880, 1881, 1884 and 1886.

+ No exempts under the law at this time—and no certificates based on years of practice, will be issued hereafter.

From the above tabular statement it will be seen that the number of those engaged in medical practice in the last ten years is nearly the same, notwithstanding there is a marked increase of population; also, while the aggregate number of practioners has not materially varied, there are some noticable changes in the numbers of the different classes. Thus, there has been a gain of 1,167 graduates and licentiates—these now forming 91 per cent. of the total number, as against about 76 per cent. in 1880; the number of licentiates upon examination of the STATE BOARD has been largely diminished—mainly by their transfer to the number of graduates, very many of them having, subsequent to their examination, attended lectures and obtained diplomas; also to the fact that few are added to this class owing to the increasing severity of the examinations by the BOARD.

The following summary, from the first Register, and corresponding figures from the present volume, exhibit these changes for the whole period since the Medical-Practice Act went into operation:

	July 1, 1877.	Jan. 1, 1890.
Total number engaged in practice	<u>7,400</u>	<u>6,215</u>
Graduates and licentiates.	3,600	5,640
Non-graduates.....	3,800	575
Percentage of graduates and licentiates in 1877.....		48
Percentage of graduates and licentiates Jan. 1, 1890.		91
Percentage of non-graduates in 1877.....		52
Percentage of non-graduates Jan. 1, 1890.....		9
During the period of its existence or up to January 1, 1890, the BOARD has issued certificates to physicians.....		<u>10,453</u>
To graduates and licentiates of medical institutions.....		8,949
To exempts, on years of practice.....		1,228
To licentiates upon examination, STATE BOARD OF HEALTH.....		246

Diplomas or licenses have been presented by those now in practice in the State from 151 medical colleges and licensing bodies in the United States, from 18 in Germany, 18 in Great Britain and Ireland, 13 in Canada, 8 in Switzerland, 6 in Russia, 4 in Austria, 2 in Sweden, 2 in France, 1 in Denmark, 1 in Norway, 1 in Madeira, 1 in Spain, 1 in Bolivia, 1 in Italy, 1 in Belgium, 1 in Uruguay—making a total of 230 graduating or licensing bodies represented.

The subjoined list shows the number of representatives of these various bodies in the Third, Fourth and Fifth Official Registers:

Dec. 4, 1880	College of Physicians and Surgeons, Chicago	Mar. 13, 1883

ADDITIONS AND CORRECTIONS—*Continued.*

- Anderson, Marion J.: died at Walla Walla, Washington; aged 48 years; Oct. 7, 1888; of pneumonia.
- Bassett, Eugene A.: registered and certificate recorded in Cook county; Dec. 20, 1889.
- Beard, Charles H.: registered and certificate recorded in Cook county, Nov. 21, 1889.
- Bellomy, William T.: graduate of College of Physicians and Surgeons of Chicago—not Keokuk.
- Bloxam, Henry: died at Mt. Auburn; aged 65 years; Dec. 21, 1889.
- Bluthardt, O. R.: registered and certificate recorded in Cook county, Nov. 23, 1889.
- Brix, D.: registered and certificate recorded in Cook county, Nov. 23, 1889.
- Butler, George F.: registered and certificate recorded in Cook county, Nov. 23, 1889.
- Clarke, Chester M.: registered and certificate recorded in Henry county, Dec. 16, 1889.
- Cullen, Frank C.: registered and certificate recorded in Cook county, July 27, 1889.
- Cushman, Bessie: registered and certificate recorded in Cook county, Dec. 20, 1889.
- Dailey, James H.: instead of Daly, James H., as on page 144.
- Darrah, A. T.: died of congestion of liver.
- De Veney, S. Charles: registered and certificate recorded in Cook county, Dec. 5, 1889.
- Dodd, George S.: certificate recorded in Pope county, May 21, 1888.
- Doty, Perry J.: died at Jonesboro; aged 27; Dec. 1889; of pneumonia.
- Emery, Sarah: has removed from 90, 22d st. to 83, 31st st., Chicago; registered and certificate recorded, Dec. 23, 1889.
- Farrar, Miles C.: age 27; nativity, Missouri; registered and certificate recorded in LaSalle county, Dec. 11, 1889.
- Frost, William D.: died at Richview; aged 64 years; Dec. 1889.
- Gandy, Thomas R.: died at Chicago; aged 40 years; Dec. 26, 1889; killed by a railroad train.
- Gause, Amos W.: instead of Ganse, as on page 6.
- Gause, Edwin J.: instead of Ganse, as on page 6.
- Gentry, William D.: registered and certificate recorded in Cook county, Dec. 9, 1889.
- Going, Zenas H.: has removed from Warren, Jo Daviess county, to 2702 State st., Chicago; registered and certificate recorded in Cook county, Dec. 27, 1889.
- Green, S. M.: has also a certificate issued Jan. 7, 1890, upon diploma of Medical Department, University of Louisville, dated March 1, 1889.
- Harmon, Henry: has removed from Monroe Centre, Ogle county, to 273 North May st., Chicago; registered and certificate recorded in Cook county, Dec. 21, 1889.
- Harsha, William M.: removed from Decatur, Macon Co., to 58 S. State st., Chicago.
- Hays, Jacob: registered and certificate recorded in Cook county, Feb. 23, 1887.
- Hektoen, Ludwig: has removed from 280 to 210 West Indiana street.
- Ingram, W. T.: instead of Irgram, W. T., as on page 122.
- Johnson, R. B.: died at Morrison; aged 56 years; Nov. 28, 1888; of cerebro meningitis.
- Lackey, R. M.: passed examination of the Illinois Army Medical Examining Board, Dec. 15, 1862.
- Marion, Francis E.: registered and certificate recorded in Pike county, Jan. 14, 1889.
- Marlin, Keyes S.: instead of Marhn, Keysey S., as on page 212; passed examination of the Illinois Army Medical Examining Board, July 26, 1865.
- McAnally, J. F.: registered and certificate recorded in Jackson county, April 30, 1880.
- McGeehon, James K.: instead of McGeehon, James K., as on page 210.
- McPherson, Finley: has removed from 2 Winthrop Pl., to 311 31st st., Chicago; registered and certificate recorded in Cook county, Dec. 31, 1889.
- McShea, Royal: instead of McShea, Boyal, as on page 18.
- Miller, Horatio W.: registered and certificate recorded in Champaign county, Dec. 16, 1889.
- Morris, William T.: registered and certificate recorded in Pike county, Dec. 14, 1889.
- Nash, Frank Wylie: has removed from Rockford, Winnebago county, to Big Rock, Kane county.
- Plumer, Thomas R.: has removed from Trivoli, Peoria county, to Farmington, Fulton county.
- Rendleman, John J.: instead of Bendleman, as on page 6.
- Russell, Orange H.: certificate recorded in Henderson county, Oct. 17, 1889.
- Smith, Emmet L.: registered and certificate recorded in Cook county, Dec. 2, 1889.
- Stone, J. A. M.: registered and certificate recorded in Lawrence county, Aug. 12, 1889.
- Strain, Mariam G.: registered and certificate recorded in Cook county, Dec. 11, 1889; certificate issued Jan. 20, 1887, instead of Jan. 20, 1886, as on page 78.
- Stubblefield, Frank A.: registered and certificate recorded in McLean county, Oct. 4, 1889.
- Vredenburgh, Samuel H.: certificate recorded in Vermilion county, Apr. 24, 1879.
- Wheeler, Frances W.: registered and certificate recorded in Cook county, Dec. 4, 1889.
- Whitmire, J. W.: registered May 23, 1887; certificate recorded May 18, 1886, in Livingston county.
- Young, Annie M.: has removed from Chicago to Peoria; registered and certificate recorded in Peoria county, Jan. 6, 1890.
